

1. Record Nr.	UNINA9910300167403321
Autore	Piazza Gregory
Titolo	Handbook for Venous Thromboembolism // by Gregory Piazza, Benjamin Hohlfelder, Samuel Z. Goldhaber
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer, , 2015
ISBN	3-319-20843-8
Edizione	[1st ed. 2015.]
Descrizione fisica	1 online resource (152 p.)
Disciplina	610
Soggetti	Cardiology Pharmacotherapy
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references at the end of each chapters and index.
Nota di contenuto	Overview of Venous Thromboembolism -- Risk Factors for Venous Thromboembolism -- Pathophysiology of Deep Vein Thrombosis and Pulmonary Embolism -- Diagnosis of Deep Vein Thrombosis -- Diagnosis of Pulmonary Embolism -- Risk Stratification and Prognosis -- Advanced Therapy for Venous Thromboembolism -- Anticoagulation for Venous Thromboembolism -- Long-term Management of Venous Thromboembolism -- Prevention of Venous Thromboembolism .
Sommario/riassunto	This handbook provides a state-of-the-art but practical guide to understanding the risk factors and pathophysiology, diagnosis and risk stratification, and treatment and prevention of venous thromboembolism (VTE). VTE, including deep vein thrombosis and pulmonary embolism , is the third most common cardiovascular disorder after myocardial infarction and stroke. Accordingly, an understanding of the risk factors, pathophysiology, diagnosis, treatment, and prevention of VTE is critical for all clinicians, and not just cardiovascular medicine specialists. With the use of clinical vignettes and self-assessment questions to emphasize key concepts from each chapter, Handbook of Venous Thromboembolism will enable readers to incorporate changes in a rapidly advancing field into the daily care of patients who have suffered or are at risk of developing VTE.
