

1. Record Nr.	UNINA9910300171703321
Titolo	Male Stress Urinary Incontinence / / edited by Giulio Del Popolo, Donatella Pistolesi, Vincenzo Li Marzi
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer, , 2015
ISBN	3-319-19252-3
Edizione	[1st ed. 2015.]
Descrizione fisica	1 online resource (189 p.)
Collana	Urodynamics, Neurourology and Pelvic Floor Dysfunctions, , 2510-4047
Disciplina	616.63
Soggetti	Andrology Surgery
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references at the end of each chapters.
Nota di contenuto	Morphological and functional anatomy of male pelvis -- Continence physiology and male stress incontinence pathophysiology. - Incontinence definition and classification -- From many type of surgical damage (open/endoscopic/laparoscopic/robot assisted surgery) to different treatments -- Diagnostic workup -- Treatment algorithm and recommendations -- Rehabilitative and pharmacological treatment -- Surgical treatment -- Surgery complications and their management.
Sommario/riassunto	This book aims to offer a comprehensive and up-to-date overview of male stress urinary incontinence that will serve as a useful tool and reference for urologists, andrologists, physiotherapists, general practitioners, and nurses. Detailed information is provided on diagnostic workup, including clinical assessment and the role of urodynamic evaluations and other instrumental examinations, and on the full range of potential treatments, from conservative and pharmacological interventions to surgical options. In addition to careful descriptions of the surgical procedures themselves, clear advice is given on the management of iatrogenic complications of incontinence surgery. Helpful treatment algorithms and recommendations offer further practical support. Relevant background knowledge is provided in expert reviews of topics such as the functional anatomy of the male

pelvis and the pathophysiology, epidemiology, and classification of male urinary incontinence.
