| Edizione | [1st ed. 2015.] |
| Descrizione fisica | 1 online resource (157 p.) |
| Disciplina | 610 |
| Soggetti | Cardiology |
| Lingua di pubblicazione | Inglese |
| Formato | Materiale a stampa |
| Livello bibliografico | Monografia |
| Note generali | Description based upon print version of record. |
| Nota di contenuto | Angina -- Heart Failure -- Atrial Fibrillation -- Syncope and sudden death -- Systemic Hypertension -- Pulmonary Hypertension. |
| Sommario/riassunto | This book focuses on cardiovascular conditions that clinicians are likely to encounter more frequently in their practice and which pose major diagnostic and therapeutic challenges. It addresses some of the most commonly asked questions in relation to the diagnosis, differential diagnoses and management of the cardiovascular conditions presented. With an emphasis on the pharmacological treatment of the conditions mentioned, all of the information contained in the chapters is evidence-based, with flowcharts, diagrams and images included to facilitate the reading of the book. Investigating and Managing Common Cardiovascular Conditions serves as a practical guide for General Practitioners, cardiology trainees, nurses with an interest in cardiology, and junior physicians who face the challenge of assisting people affected by cardiovascular conditions. . |
