

1. Record Nr.	UNINA9910300174303321
Autore	Joseph Benjamin
Titolo	Paediatric Orthopaedic Diagnosis [[electronic resource] ] : Asking the Right Questions // by Benjamin Joseph, James Robb, Randall T Loder, Ian Torode
Pubbl/distr/stampa	New Delhi : , : Springer India : , : Imprint : Springer, , 2015
ISBN	81-322-2392-6
Edizione	[1st ed. 2015.]
Descrizione fisica	1 online resource (441 p.)
Disciplina	610 617.47 618.92
Soggetti	Pediatrics Orthopedics Surgical Orthopedics
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	The deformed hip -- The deformed femur -- The deformed knee -- The bowed tibia -- The deformed foot -- The inverted foot -- The everted foot -- The deformed shoulder -- The deformed elbow -- The deformed wrist -- The deformed spine -- Anomalies of fingers or toes -- Absence of digits of the hands or feet -- Duplication of fingers -- Duplication of toes -- Deformities of the fingers or toes -- Limb length inequality at birth -- Abnormal body proportions or dwarfism evident at birth -- Decreased movement of an upper or lower limb in the neonate -- Deformities of the neck and limitation of movement of the neck -- The child with multiple deformities -- Acquired deformities of the knee -- In-toeing gait and out-toeing gait -- Toe walking -- The flat foot -- The child with a painless limp -- The delayed walker -- Deformities and limitation of movements of the shoulder girdle -- Deformities and limitation of motion of the forearm -- Deformities and limitation of movements of the wrist -- Brittle bones and frequent fractures -- The child with a painful limp -- The painful hip -- Short stature and altered body proportions -- Gigantism -- Acquired limb length inequality -- The painful hip in adolescence -- The painful knee

in adolescence -- The painful foot adolescence.

---

## Sommario/riassunto

The book presents a problem-based, rational approach to the diagnosis of orthopaedic problems in children. It is divided into five sections based on the age at which specific problems may be encountered; the newborn, the neonate and infant, the toddler and the pre-school child, the child in the school-going age and the adolescent. The authors outline a systematic approach to arrive at a tentative diagnosis by asking relevant questions related to the presenting symptom and then performing a thorough clinical examination. They then suggest the most appropriate investigations to confirm the diagnosis. Each chapter deals with the common conditions that may lead to the problem; the rarer causes of the problem are listed at the end. This feature would make the book a practical manual and a high quality reference source. An important feature of the book is the number and quality of illustrations and video clips in the electronic version.
