

1. Record Nr.	UNINA9910300182803321
Autore	Erovic Boban M
Titolo	Manual of Head and Neck Reconstruction Using Regional and Free Flaps // by Boban M Erovic, Piero Lercher
Pubbl/distr/stampa	Vienna : , : Springer Vienna : , : Imprint : Springer, , 2015
ISBN	3-7091-1172-2
Edizione	[1st ed. 2015.]
Descrizione fisica	1 online resource (263 p.)
Disciplina	610 617.5 617.51 617.522059 617952
Soggetti	Otolaryngologic surgery Oral surgery Maxillofacial surgery Otorhinolaryngology Plastic surgery Head and Neck Surgery Oral and Maxillofacial Surgery Plastic Surgery
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Part I: Introduction -- 1. History of microvascular surgery -- 2. Selection of flaps -- 3. Classification of flaps -- 4. Preoperative considerations -- 5. Intraoperative considerations -- 6. Arterial anastomosis -- 7. Venous anastomosis -- 8. Postoperative care -- 9. Timetable of homeostasis -- 10. Flap surveillance protocol -- 11. No patency and flap salvage options -- 12. Skin graft harvest -- 13. Full-thickness skin graft -- 14. Harvesting vein grafts -- 15. Sural nerve grafts -- 16. Harvest of rib cartilage -- Part II: Regional Flaps -- 17. Paramedian flap -- 18. Buccal flap -- 19. Palatal island flap -- 20. Facial artery musculomucosal flap -- 21. Sternocleidomastoid flap -- 22. Supraclavicular artery flap -- 23. Deltpectoral flap -- 24.

Pectoralis major flap -- Part III: Free flaps -- 25. Tempoparietal fascia free flap -- 26. Scapula/parascapula free flap -- 27. Latissimus dorsi free flap -- 28. Radial forearm free flap -- 29. Tensor fascia lata free flap -- 30. Anterolateral thigh flap -- 31. Fibula free flap.

#### Sommario/riassunto

Ablative tumor surgery of the head and neck region often results in severe cosmetic and functional deformities. In these cases, microvascular free-tissue transfer enables three-dimensional reconstruction of head and neck defects. The selection of adequate donor tissue and a profound knowledge of the human anatomy and the various harvesting techniques are paramount in ensuring successful reconstruction. Reflecting current surgical approaches, this book presents the most frequently used flaps in head and neck surgery, including detailed overviews as well as their respective pearls and pitfalls. Moreover, each section contains a synopsis and pre-operative checklist. The overlay-technique merges high-quality-photographs with drawings and precisely illustrates the step-to-step descriptions of the different flap harvesting techniques, making this manual in pocket size an unique and accessible reference for both doctors in training and specialists in the field of otolaryngology, head and neck, plastic, maxillofacial and skull base surgery.
