Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Psychosocial Consequences of Wounds -- Pain -- Stress -- Quality of Life and Well-Being -- Different wound type -- Treatment -- Concordance -- Family, friends and social support -- Conclusion.
Sommario/riassunto	This book addresses the psychological consequences of wounds and the psychological components of wound care, building on contemporary research evidence and presenting practical clinical guidelines. Particular emphasis is given to the psychological impact of both wounds and wound treatment. Implications for practice are discussed, making this book both educational and

practical. *Psychology of Wounds and Wound Care in Clinical Practice* is aimed at clinicians, including GPs, vascular surgeons and physicians, nurses, especially tissue viability nurses, and podiatrists, and is also of interest to academic teachers and researchers.
