

1. Record Nr.	UNINA9910300186303321
Titolo	Skin, Mucosa and Menopause : Management of Clinical Issues // edited by Miranda A. Farage, Kenneth W. Miller, Nancy Fugate Woods, Howard I. Maibach
Pubbl/distr/stampa	Berlin, Heidelberg : , : Springer Berlin Heidelberg : , : Imprint : Springer, , 2015
ISBN	3-662-44080-6
Edizione	[1st ed. 2015.]
Descrizione fisica	1 online resource (510 p.)
Disciplina	610 616.5 618.1
Soggetti	Dermatology Gynecology Gynecology
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	What is Menopause? -- Skin and Menopause -- Effect of Supplementations and Vitamins on Menopause -- Hormonal Change and Therapy -- Menopause and Genital -- Menopause and Autoimmune Disease -- Hotflahes -- Other Therapy for Menopause -- Sexual Decline -- Menopause Tests -- Menopause and Sleep -- Menopause and Mental Effects -- Menopause and Quality of Life -- Menopause and cosmetic procedures.
Sommario/riassunto	An era of global population aging is upon us. By 2030, one in eight people will be over age 65. Since women generally live longer than men, the health and welfare of postmenopausal women will become a significant public health concern. This book offers a comprehensive review of the life changes associated with menopause, both at the dermatological and physiological level (e.g., hormonal, immunological) and at the subcellular level. It critically examines the dermatological, biological, and clinical challenges to postmenopausal health and well-being and the current and emerging therapeutic interventions. The authors advocate a holistic approach, emphasizing the need to view the

menopause as a life transition with various facets rather than as a series of distinct medical conditions to be managed. Our goal is to offer a comprehensive resource to the researchers, clinicians, physicians, and helping professions whose mission is to promote the health and well-being of women around the world.
