

1. Record Nr.	UNINA9910300192103321
Titolo	Disorders of the Hand [[electronic resource]] : Volume 4: Swelling, Tumours, Congenital Hand Defects and Surgical Techniques // edited by Ian A. Trail, Andrew N.M. Fleming
Pubbl/distr/stampa	London : , : Springer London : , : Imprint : Springer, , 2015
ISBN	1-4471-6563-2
Edizione	[1st ed. 2015.]
Descrizione fisica	1 online resource (284 p.)
Disciplina	617.47 617.575
Soggetti	Orthopedics Surgical Orthopedics
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Ganglia of the Hand and Wrist -- Pigmented villonodular synovitis in the hand -- Vascular Anomalies of the Upper Limb -- Glomus Tumour -- Tumours of the Hand -- Failure of Formation of Parts Transverse and Longitudinal -- Failure of Differentiation of Parts -- Polydactyly -- Upper Limb Overgrowth -- Undergrowth -- Constriction Ring Syndrome -- Congenital Anomalies of the Hand -- Wrist arthroscopy -- Diagnosis & Therapeutic -- PIPJ Replacement -- MCP Arthroplasty -- Total and Partial Wrist Implant Arthroplasty -- DRUJ Replacement Arthroplasty.
Sommario/riassunto	This book comes at a time when significant advances in the understanding of hand disorders have resulted in vast improvements in the quality of life for patients. It describes the techniques and practices for the diagnosis and treatment of various disorders of the hand and wrist. Each condition is discussed in detail and illustrated with images, radiographs and line drawings. Clinical pearls are provided for every chapter to provide practical guidance on surgical procedures. Disorders of the Hand contains contributions from many of the hand surgeons who are at the forefront of this evolving area in the management of both elective and trauma hand surgery. This volume and its three sister volumes aim to improve care for current patients with hand and wrist

complaints, while inspiring surgeons to think in greater detail about treatment options that will provide even better care in the future.
