### Sommario/riassunto

This volume seeks to identify and examine two categories of colonial and postcolonial knowledge production about Africa. These two broad categories are "environment" and "landscape," and both are useful and problematic to explore. Discussions about African environments often concentrate on Africans as perpetrators of their own land, causing degradation from lack of knowledge and technology. "Landscape" defines the category of knowledge produced by foreigners about Africa, where Africans remain part of the scenery and yield no agency over their surroundings. To flesh out these categori

Sommario/riassunto	The theory of linear Volterra integro-differential equations has been developing rapidly in the last three decades. This book provides an easy to read concise introduction to the theory of ill-posed abstract Volterra integro-differential equations. A major part of the research is devoted to the study of various types of abstract (multi-term) fractional differential equations with Caputo fractional derivatives, primarily from their invaluable importance in modeling of various phenomena appearing in physics, chemistry, engineering, biology and many other sciences. The book also contributes to th
