

1. Record Nr.	UNINA9910300217503321
Titolo	Transition and Lifelong Care in Congenital Urology // edited by Hadley M. Wood, Dan Wood
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Humana , 2015
ISBN	3-319-14042-6
Edizione	[1st ed. 2015.]
Descrizione fisica	1 online resource (221 p.)
Collana	Current Clinical Urology, , 2197-7194
Disciplina	616.6
Soggetti	Urology Pediatrics
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	The basics -- The transition process: Initial assessment and defining goals and development of the multidisciplinary team -- Approach to the myelodysplasia patient -- Approach to the exstrophy patient -- Approach to the posterior urethral valve patient -- Approach to the hypospadias cripple -- Genital/urethra -- Sexual function/fertility in myelodysplasia -- Male (ejac/erectile) -- Female (incl POP) -- Revision genitoplasty, sexual function, fertility and pelvic organ prolapse in exstrophy + management of pregnancy -- Natural history of adults with hypospadias + urethral reconstruction, fertility, and chordee in hypospadias -- Issues in the long-term management of adolescents and adults with disorders of sexual differentiation (management of gonads, genital reconstruction, late presentation of the undiagnosed DSD) -- Lower tract problems in adulthood for patients with bladder reconstructions -- New or escalating recurrent UTIs/TBD -- Progressive renal deterioration – distinguishing urological from nephrological causes. Include nephrology input on renal protection -- New or worsening incontinence -- Trouble-shooting urostomies (leakage/stenosis) – indications for and approaches to revision surgery -- Cancer risk and surveillance in the patient with a augmentation cystoplasty or urostomy -- Upper tract considerations -- Renal transplant in patients with abnormal lower tracts -- Management of calculi in patients with malabsorption or osteodystrophy -- Late

presentation of patient with primary bladder neck obstruction and/or PUV -- Age-related urological problems in the complex urological patient -- BPH and neurogenic bladder -- Prostate cancer screening/treatment -- Hypogonadism -- Urological follow-up of childhood malignancies eg Wilms Tumor and Rhabdomyosarcomas.

Sommario/riassunto

This volume will cover many of the most prevalent challenges for the urologist caring for adult congenital patients. The first section of the text will provide a framework for transition to an adult care model as well as a general approach to patients with three of the most common conditions encountered in congenitalism: myelodysplasia, Hypospadias, and exstrophy. The remainder of the text will cover anatomic issues in sexuality, fertility and genital issues, lower tract management, as well as upper tract management. Lastly, urological care of the pediatric cancer survivor will also be reviewed. Transition and Lifelong Care in Congenital Urology is a valuable guide for Urologists providing long term care and treatment to patients with congenital anomalies and urological age-related problems. .
