

1. Record Nr.	UNINA9910300219303321
Titolo	Safety in Office-Based Dermatologic Surgery // edited by Jacob O. Levitt, Joseph F. Sobanko
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer, , 2015
ISBN	3-319-13347-0
Edizione	[1st ed. 2015.]
Descrizione fisica	1 online resource (195 p.)
Disciplina	610 613 614.44 616.5
Soggetti	Dermatology Health promotion Health Promotion and Disease Prevention
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Epidemiology -- What to do if exposed -- Personal safety equipment -- General Principles -- Setting up a tray -- Injection -- Working with an assistant -- Excision -- Hemostasis -- Suturing -- Venipuncture -- Curettage -- Cryotherapy -- Acne surgery -- Nail clipping -- Lasers and PDT.
Sommario/riassunto	In medical practice, unfamiliarity with procedures increases the likelihood of occupational exposures. Learning to perform a procedure properly early on reinforces safe habits, improves overall surgical safety, and reduces occupational exposures. Safety in Office-Based Dermatologic Surgery is relevant to any healthcare professional who participates in office-based procedures, such as injections, biopsies, excisions, and laser surgery. The authors bring over 15 years' combined experience in training residents and medical students, enabling them to identify common unsafe practices in office-based surgery. Chapters are divided into individual procedures for easy referencing by students, trainees, as well as seasoned practitioners. Figures illustrate how seemingly innocuous actions and procedures can

result in dangerous exposures to healthcare workers. Hazardous scenarios are subsequently followed with one or a series of safer solutions, with the accident and solution concisely explained and clearly illustrated.
