Sommario/riassunto	Recently, a wall was built in eastern Germany. Made of steel and cement blocks, topped with razor barbed wire, and reinforced with video monitors and movement sensors, this wall was not put up to protect a prison or a military base, but rather to guard a three-day meeting of the finance ministers of the Group of Eight (G8). The wall manifested a level of security that is increasingly commonplace at meetings regarding the global economy. The authors of Shutting Down the Streets have directly observed and participated in more than 20 mass actions against global in North America and Europe, beginning with the watershed 1999 WTO meetings in Seattle and including the 2007 G8 protests in Heiligendamm. Shutting Down the Streets is the first book to conceptualize the social control of dissent in the era of

alterglobalization. Based on direct observation of more than 20 global summits, the book demonstrates that social control is not only global, but also preemptive, and that it relegates dissent to the realm of criminality. The charge is insurrection, but the accused have no weapons. The authors document in detail how social control forecloses the spaces through which social movements nurture the development of dissent and effect disruptive challenges.

Nota di bibliografia	Includes bibliographical references at the end of each chapters.
Nota di contenuto	Summary of anatomy and physiology of perigastric lymphatic system -- The current status and development of laparoscopic lymph node dissection for gastric cancer -- Preoperative notes of laparoscopic lymph node dissection for gastric cancer -- Laparoscopic infrapyloric area lymph node dissection for gastric cancer -- Laparoscopic suprapancreatic area lymph node dissection for gastric cancer -- Laparoscopic splenic hilar area lymph node dissection for gastric cancer

-- Laparoscopic cardiac area lymph node dissection for gastric cancer
-- Reconstruction of the digestive tract after laparoscopic gastrectomy for gastric cancer -- Prevention and treatment of complications associated with laparoscopic surgery for gastric cancer.

Sommario/riassunto

This book presents surgical techniques and detailed illustrations of laparoscopic gastrectomy for gastric cancer, focusing on effective, concise steps and techniques. It describes in detail the perigastric anatomy, and the incidences of each anatomical structure are analyzed statistically. It also discusses lessons learned and best practices in the management of gastric cancer patients, and includes video captures of precise operational techniques -essential resources for gastrointestinal laparoscopic surgeons. Given its close connection to clinical practice, it offers a valuable reference work for general surgeons and residents. Editor Chang-Ming Huang is a Professor at the Department of Gastric Surgery, Fujian Medical University Union Hospital, China. Editor Chao-Hui Zheng is an Associate Professor at the same department.
