Record Nr. UNINA9910300230703321 Autore Rietjens Mario Titolo Atlas of Breast Reconstruction / / by Mario Rietjens, Mario Casales Schorr, Visnu Lohsiriwat Milano:,: Springer Milan:,: Imprint: Springer,, 2015 Pubbl/distr/stampa **ISBN** 88-470-5519-9 Edizione [1st ed. 2015.] Descrizione fisica 1 online resource (532 p.) 610 Disciplina 611 616994 617 Soggetti Cancer - Surgery Surgery Plastic surgery Human anatomy Surgical Oncology **Plastic Surgery Anatomy** Lingua di pubblicazione Inglese **Formato** Materiale a stampa Livello bibliografico Monografia Note generali Description based upon print version of record. Nota di bibliografia Includes bibliographical references. 1 Reconstruction technique for total mastectomy -- 2 Reconstruction Nota di contenuto technique for partial mastectomy and other partial breast deformities. - 3 Reconstruction and correction techniques for Nipple-Areola Complex -- 4 Lipofilling.- 6 Surgical correction of complications. Sommario/riassunto Back Cover Text Breast reconstructive and oncoplastic surgery can reduce the sense of mutilation resulting from oncologic surgery and meets the need to provide breast cancer treatment that will not only eradicate the cancer but also re-establish the patient's quality of life. However, the difficulties inherent in preoperative planning and the intraoperative complexity of breast reconstruction and oncoplastic techniques represent major challenges for the breast surgeon. This

atlas, intended for surgeons at every level, is an all-inclusive guide that documents surgical techniques step by step by means of a wealth of

more than 1000 color photos, additional high-quality drawings and illustrations, and succinct accompanying text. Both common, established procedures and the most recently introduced techniques are covered, ensuring that readers will have at their disposal multiple approaches for breast repair, remodeling, and reconstruction. In addition to the comprehensive descriptions of techniques, preoperative planning is explained, indications and contraindications are identified, and the management of surgical complications is discussed. Tips, pitfalls, and key points are highlighted. The Atlas of Breast Reconstruction is an unprecedented tool that will increase and refine the arsenal at the oncoplastic surgeon's disposal in order to ensure that the best treatment can be offered to each individual patient.
