

1. Record Nr.	UNINA9910300234603321
Autore	Bartolotta Tommaso Vincenzo
Titolo	Atlas of Contrast-enhanced Sonography of Focal Liver Lesions // by Tommaso Vincenzo Bartolotta, Adele Taibbi, Massimo Midiri
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer, , 2015
ISBN	3-319-17539-4
Edizione	[1st ed. 2015.]
Descrizione fisica	1 online resource (150 p.)
Disciplina	610 616 616.0757 616.33 616994 617
Soggetti	Radiology Gastroenterology Oncology Internal medicine Surgery Imaging / Radiology Gastroenterology Internal Medicine
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	Introduction -- Benign Focal Liver Lesions -- Malignant Focal Liver Lesions -- Fatty Liver, Pseudolesions -- Other Rare Lesions -- Assessment of Therapy Response -- Impact of European Guidelines on CEUS.
Sommario/riassunto	This book offers an image-based, comprehensive quick reference guide that will assist in the interpretation of contrast-enhanced ultrasound (CEUS) examinations of the liver in daily practice. It describes and depicts typical and atypical behavior of both common and less frequently observed focal liver lesions. For each type of lesion, the

findings on pre- and post-contrast images are presented and key characteristics are highlighted. Individual chapters also focus on the assessment of response to locoregional and systemic treatment and the impact of European guidelines on CEUS. The *Atlas of Contrast-Enhanced Sonography of Focal Liver Lesions* will serve as an invaluable hands-on tool for practitioners who need to diagnose liver lesions using CEUS in the major clinical settings: oncology patients, cirrhotic patients, and patients with incidental focal liver lesions. .
