| Titolo | Imaging and Pathology of Pancreatic Neoplasms : A Pictorial Atlas / / edited by Mirko D'Onofrio, Paola Capelli, Paolo Pederzoli |
| Pubbl/distr/stampa | Milano : , : Springer Milan : , : Imprint : Springer, , 2015 |
| ISBN | 9788847056787 88-470-5678-0 |
| Edizione | [1st ed. 2015.] |
| Descrizione fisica | 1 online resource (439 p.) |
| Disciplina | 610 616.07 616.0757 616994 |
| Soggetti | Radiology Pathology Cancer - Treatment Cancer Therapy |
| Lingua di pubblicazione | Inglese |
| Formato | Materiale a stampa |
| Livello bibliografico | Monografia |
| Note generali | Description based upon print version of record. |
| Nota di bibliografia | Includes bibliographical references and index. |
| Nota di contenuto | Ductal Adenocarcinoma -- Neuroendocrine Neoplasm -- Intraductal Neoplasms -- Serous Neoplasms -- Mucinous Neoplasms -- Solid-Pseudopapillary Neoplasms -- Secondary Tumors and Lymphoma -- Rare Neoplasms -- Driving Questions and Flow Charts Imaging -- Stigmatte Review and Interpretation. |
| Sommario/riassunto | Although interest in pancreatic pathology is very high in the radiological and gastroenterological communities, it is still the case that less is known about pathology of the pancreas than about liver pathology, for example. Diagnosis depends on the structure of the pancreatic lesion, which can be directly visualized on US, CT or MR images. This atlas, which encompasses both the imaging and the pathology of pancreatic neoplasms, will therefore be invaluable in enabling radiologists and sonographers to understand the underlying pathology and in allowing pancreatic pathologists to understand the imaging translation. The emphasis in the atlas is very much on the pathological and imaging appearances, with most of the text |

concentrated at the beginning of the chapters. A comprehensive overview is provided of typical and atypical presentations and diverse aspects of common and uncommon pancreatic neoplasms, including ductal adenocarcinoma, neuroendocrine neoplasms, intraductal papillary mucinous neoplasms, cystic neoplasms, metastases and lymphoma.
