

1. Record Nr.	UNINA9910300235003321
Titolo	Swallowing – Physiology, Disorders, Diagnosis and Therapy [[electronic resource] /] / edited by Gauri Mankekar
Pubbl/distr/stampa	New Delhi : , : Springer India : , : Imprint : Springer, , 2015
ISBN	81-322-2419-1 81-322-2418-3
Edizione	[1st ed. 2015.]
Descrizione fisica	1 online resource (229 p.)
Disciplina	610 616 617.03 617.51
Soggetti	Otorhinolaryngology Internal medicine Rehabilitation Internal Medicine
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	Anatomy of swallowing -- Physiology of swallowing -- Swallowing disorders: Clinical features & diagnosis -- Assessment of swallowing disorders -- Endoscopic management of swallowing disorders -- Radiological diagnosis in swallowing disorders -- Neurogenic dysphagia -- Medical management of swallowing disorders -- Pediatric dysphagia -- Presbyphagia.
Sommario/riassunto	Swallowing difficulty or dysphagia is a common disorder and affects all age groups from the newborn to the elderly. Several medical conditions like lack of dentition, gastroesophageal reflux disease, eosinophilic esophagitis, cardiomegaly and strokes can cause dysphagia. It can also follow head -neck surgeries. It is important to diagnose and treat dysphagia, otherwise it can lead to malnutrition and dehydration. Improved understanding of the physiology of swallowing, advances in endoscopic and radiological techniques along with an increasing elderly population has resulted in development of a separate swallowing disorders discipline. This book would be an aid for clinicians, educators

and trainees from the fields of speech language pathology, pediatrics, otolaryngology, gastroenterology, oncology, neurology, geriatrics and rehabilitation, all of who form a part of the multidisciplinary swallowing team.
