

1. Record Nr.	UNINA9910300239303321
Autore	Dubey Siba P
Titolo	Color Atlas of Head and Neck Surgery [[electronic resource] ] : A Step-by-Step Guide // by Siba P. Dubey, Charles P. Molumi
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer, , 2015
ISBN	3-319-15645-4
Edizione	[1st ed. 2015.]
Descrizione fisica	1 online resource (190 p.)
Disciplina	610 617.5 617.5/1059 617.51 617.522059 617952
Soggetti	Otorhinolaryngology Otolaryngologic surgery Plastic surgery Oral surgery Maxilla - Surgery Head and Neck Surgery Plastic Surgery Oral and Maxillofacial Surgery
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Surgery of the Nose and Paranasal sinus -- Laryngeal Surgery -- Thyroid Surgery -- Salivary Gland surgery -- Neck Dissection -- Local flaps in reconstruction of oral defects -- Surgery of the Mandible -- Facial plastic surgery -- Temporal bone carcinoma surgery. .
Sommario/riassunto	This surgical atlas, featuring a wealth of color photographs, provides detailed step-by-step descriptions of a wide range of open head and neck procedures, including radical and conservative (organ preservation, functional) approaches, aesthetic and reconstructive surgeries with the use of axial and free flaps, and surgery within the

narrow confines of the skull base. Individual chapters are dedicated to surgery of the nose and paranasal sinuses, laryngeal surgery, thyroid surgery, surgery of the salivary glands, surgery of the mandible, surgery for temporal bone malignancy, facial plastic surgery, neck dissection, and surgery of the lip and oral cavity. The atlas will be a comprehensive practical reference for clinicians in the various specialties involved in head and neck surgery, including otolaryngologists, head and neck surgeons, plastic surgeons, maxillofacial surgeons, and surgical oncologists. It will assist practitioners in achieving the high level of competence that is essential owing to the large number of vital structures in the head and neck region. .
