

1. Record Nr.	UNINA9910300268303321
Titolo	Comprehensive Atlas of Dermatoscopy Cases // edited by Horacio Cabo, Aimilios Lallas
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer, , 2018
ISBN	3-319-76932-4
Edizione	[1st ed. 2018.]
Descrizione fisica	1 online resource (XV, 213 p. 394 illus., 390 illus. in color.)
Disciplina	616.5
Soggetti	Dermatology Oncology Oncology
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Structures, patterns, criteria, colours and two-step procedure -- Non melanocytic lesions: Seborrheic keratosis -- Non melanocytic lesions: Lentigo solar -- Non melanocytic lesions: Basal cell carcinoma -- Non melanocytic lesions: Angiomas & angiokeratomas -- Non melanocytic lesions: Dermatofibroma -- Non melanocytic lesions: Actinic keratoses -- Non melanocytic lesions: Squamous cell carcinoma -- Melanocytic lesions: Criteria of melanocytic lesions -- Melanocytic lesions: Melanocytic nevus -- Melanocytic lesions: Spitz nevus -- Melanocytic lesions: Blue nevus & combined nevus -- Melanocytic lesions: Recurrent nevus -- Melanocytic lesions: Melanoma -- Melanocytic lesions: Melanoma simulators -- Melanocytic lesions: Combined lesions -- Melanocytic lesions: Other less frequent lesions -- Clinical cases (from 1 to 100).
Sommario/riassunto	This practical atlas describes the use of dermoscopy in the clinic, a technique that is increasingly used by the clinical dermatologist. It revolves around the use of clinical cases, simulating what happens in in the clinic when the dermatologist is presented with a patient who has pigmented lesions. Dermatologists perform diagnoses based on what they see on the skin and with these images recognize different diseases. This whole spectrum of forms and shapes is reflected in colour. Dermoscopy opens a new and very wide field of structures and

colors that can not be seen with the naked eye and, with appropriate training and the use of this book, improves our clinical diagnosis. Comprehensive Atlas of Dermatoscopy Cases teaches the technique through specially selected clinical cases that cover the entire field of dermoscopy, providing the reader a thorough understanding of the techniques and methodologies associated with diagnosis using dermoscopy. It is of great use to the trainee dermatologist and any practicing dermatologist seeking to expand their skills with this important diagnostic tool.
