1.	Record Nr.	UNINA9910300268503321
	Titolo	Pigmentary Skin Disorders / / edited by Prasad Kumarasinghe
	Pubbl/distr/stampa	Cham:,: Springer International Publishing:,: Imprint: Springer,, 2018
	ISBN	3-319-70419-2
	Edizione	[1st ed. 2018.]
	Descrizione fisica	1 online resource (xiii, 297 pages)
	Collana	Updates in Clinical Dermatology, , 2523-8884
	Disciplina	616.55
	Soggetti	Dermatology
	Lingua di pubblicazione	Inglese
	Formato	Materiale a stampa
	Livello bibliografico	Monografia
	Nota di contenuto	1. A Clinical Classification of Pigmentary Disorders 2. Dermatopathological Clues in Pigmentary Disorders 3. Measurements of Skin Color 4. Dermoscopy of Melanoma 5. Advances in Dermoscopy of Pigmented Lesions of Skin 6. Reflectance Confocal Microscopy and Pigmentary Disorders 7. Update on Albinism 8. Recent Advances in the Pathogenesis and the Medical Management of Vitiligo 9. Surgical Modalities in Management of Vitiligo 10. Progressive Macular Hypomelanosis 11. Guttate Leukoderma 12. Current Views on Melasma 13. Macular Pigmentation of Uncertain Etiology 14. Post-inflammatory Hyperpigmentation 15. Lasers in Pigmentary Disorders 16. Phototherapy in Pigmentary Disorders 17. Chemical Peels in Pigmentary Disorders 18. Depigmenting Agents.
	Sommario/riassunto	Diagnosis and management of pigmentary skin disorders has become an important area in dermatology as the demand for treatment of these conditions has increased exponentially, particularly with skin of color. However, coverage in standard texts regarding various pigmentary disorders is insufficient and the need for focused attention on new developments and latest research findings is growing. Pigmentary Skin Disorders is written and edited by international leaders in the field and chapters include a practical clinical classification of pigmentary disorders, recent advances in vitiligo, current views on melasma, postinflammatory hyperpigmentation, lasers in pigmentary disorders, and drug-induced pigmentation. This volume is part of Springer's

Updates in Clinical Dermatology series which aims to promote the rapid and efficient transfer of medical research into clinical practice. Covering new developments and innovations in all fields of clinical dermatology, it provides the clinician with a review and summary of recent research and its implications for clinical practice. Each volume is focused on a clinically relevant topic and explains how research results impact diagnostics, treatment options and procedures, as well as patient management. The reader-friendly volumes are highly structured with core messages, summaries, tables, diagrams and illustrations and are written by internationally well-known experts in the field.
