

1. Record Nr.	UNINA9910300268603321
Titolo	Vascular Surgery : Cases, Questions and Commentaries // edited by George Geroulakos, Bauer Sumpio
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer, , 2018
ISBN	3-319-65936-7
Edizione	[4th ed. 2018.]
Descrizione fisica	1 online resource (679 pages)
Disciplina	617.4130076
Soggetti	Blood-vessels - Surgery Angiology Vascular Surgery
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Arterial Aneurysms -- Preoperative Cardiac Risk Assessment and Management of Elderly Men with an Abdominal Aortic Aneurysm -- Abdominal Aortic Aneurysm -- Endoluminal Treatment of Infra-renal Abdominal Aortic Aneurysm -- Ruptured Abdominal Aortic Aneurysms -- Thoracoabdominal Aortic Aneurysm -- Endovascular Management of Thoracic Aneurysm -- Aortic Dissection -- Popliteal Artery Aneurysms -- Renal Artery Aneurysm -- Anastomotic aneurysms -- False Aneurysm in the Groin Following Coronary Angiography -- Acute Thrombosis -- Acute Ishaemia -- Arterial Embolism -- Blast Injury to the Lower Limb -- Endovascular Management of Aortic Transection in a Multiinjured Patient -- Management Of Chronic Ischaemia of the Lower Extremities -- Cardiovascular Risk Factors and Peripheral Arterial Disease -- Endovascular Management of Lower Limb Claudication due to Iliac Artery Occlusive Disease -- Lower Limb Claudication due to Bilateral Iliac Artery Occlusive Disease: The Case for Iliac Stenting and Femorofemoral Crossover Bypass -- Endovascular Management of Lower Limb Claudication due to Infra- Inguinal Disease -- Endovascular Management of Non-Healing Leg Ulceration -- Bypass to the Popliteal Artery -- Bypass to the Infrapopliteal Arteries for Chronic Critical Limb Ischaemia -- Popliteal artery entrapment -- Adventitial Cystic Disease of the Popliteal Artery -- The Oburator Foramen Bypass -- Diabetic

Foot -- Surgery of the Major Branches of the Infradiaphragmatic Aorta -- Chronic Visceral Ischaemia -- Acute Mesenteric Ischaemia -- Renovascular Hypertension -- Midaortic Syndrome -- Management of Popliteal Hypertension -- Management of Portal Hypertension -- Management of Extracranial Cerebrovascular Disease -- Management of Carotid Bifurcation Disease -- The Carotid Body Tumor -- Takayasu Arteritis Associated with Cerebrovascular Ischemia -- Takayasu Arteritis Associated with Cerebrovascular Ischemia -- Neurovascular Conditions of the Upper Extremity.-Neurogenic Thoracic Outlet Syndrome and Pectoralis Minor Syndrome -- Acute Axillary/Subclavian Vein Thrombosis -- Raynaud's Phenomenon -- Prevention and Management of Complications of Arterial Surgery -- Aortofemoral Graft Infection -- Aortoenteric Fistulas -- Vascular Access -- The Optimal Conduit for Hemodialysis Access -- Acute Ischaemia of the Upper Extremity Following Graft Aortovenous Fistula -- Amputations -- Amputations in an Ischemic Limb -- Vascular Malformations -- Congenital Vascular Malformation -- Klippel-Trenaunay Syndrome -- Management of Venous Disorders -- Deep Venous Thrombosis -- Endoluminal Ablation of Varicose Veins -- Ultrasound Guided Foam Sclerotherapy for the Management of Recurrent Varicose Veins -- Venous Ulcers Associated with Deep Venous Insufficiency -- Venous Ulcers Associated with Superficial Venous Insufficiency -- Iliofemoral Venous Thrombosis -- Iliofemoral Venous Thrombosis During Pregnancy -- Lymphedema -- Management of Chronic Lymphedema of the Lower Extremity -- Management of Upper Extremity Lymphedema with Microsurgical Lympho-venous Anastomosis (LVA) -- Stent graft for the management of complicated acute type B dissection -- Popliteal artery thrombosis for posterior dislocation of the knee -- Superior vena cava syndrome -- SMA dissection -- Visceral aneurysm -- Juxta-renal aneurysms -- Steal Syndrome after AV fistula.

Sommario/riassunto

The editors feel that to acknowledge new data and techniques in the area of vascular surgery there is a need for new chapters to be added to the book and for previous chapters to be updated. These changes will reassure the reader that the book is following the latest developments in the field of vascular and endovascular surgery and is still relevant, and therefore a useful companion in the practice of vascular surgery at the early stages of the career of vascular trainees and specialists. The new edition has been written along the principles of evidence based medicine and will be widely referenced, presenting vascular surgery through real life scenarios that are challenging the reader by asking questions.
