

1. Record Nr.	UNINA9910300286903321
Titolo	Orthopedic Traumatology : An Evidence-Based Approach // edited by Manish K. Sethi, William T. Obremskey, A. Alex Jahangir
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer, , 2018
ISBN	3-319-73392-3
Edizione	[2nd ed. 2018.]
Descrizione fisica	1 online resource (XVII, 438 p. 69 illus., 11 illus. in color.)
Disciplina	616.7
Soggetti	Orthopedics Traumatology Traumatic Surgery
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Part I: Evidence-Based Medicine in Orthopedic Trauma Surgery -- Introduction to Evidence Based Medicine -- Part II: Spine Trauma -- Cervical Spine Clearance -- Cervical Spine Fracture Dislocation -- Lumbar Burst Fractures -- Part III: Upper Extremity Trauma -- Scapula Fractures -- Clavicle Fractures -- Proximal Humerus Fractures -- Humeral Shaft Fractures -- Distal Humerus Fractures -- Elbow Fracture Dislocation -- Distal Radius Fractures -- Part IV: Acetabular, Hip and Pelvic Trauma -- Acetabular Fractures in the Elderly -- Pelvic Ring Injury I -- Pelvic Ring Injury II -- Femoral Neck Fractures in the Elderly -- Intertrochanteric Femur Fractures -- Femoral Neck Fractures in the Young Patient -- Part V: Lower Extremity Trauma -- Diaphyseal Femur Fractures -- Distal Femur Fractures -- Knee Dislocations -- Tibial Plateau Fractures -- Closed Diaphyseal Tibia Fractures -- Open Diaphyseal Tibia Fractures -- Part VI: Foot and Ankle Trauma -- Pilon Fractures -- Trimalleolar Ankle Fractures -- Calcaneus Fractures -- Talus Fractures -- Lisfranc Injuries -- Part VII: Polytrauma, Infection and Perioperative Management of the Orthopedic Trauma Patient -- Timing of Treatment in the Multiply Injured Patient -- DVT Prophylaxis in Orthopedic Trauma -- The Infected Tibial Nail -- Perioperative Optimization in Orthopedic Trauma -- Management of Acute Post-Operative Infection.

## Sommario/riassunto

Now in its revised and expanded second edition, this comprehensive, user-friendly text brings the latest evidence to bear on the diagnosis and management of orthopedic trauma patients. Centering on clinical scenarios, each chapter is based on a specific case. Leaders in the field of orthopedic trauma provide their expert opinions on management strategies and techniques while using data as their guide. The book is divided into sections covering the spine, upper and lower extremities, hip and acetabulum, foot and ankle, polytrauma, infection and perioperative management. New chapters in this edition discuss elbow fracture dislocations, femoral neck fractures in the young, Lisfranc injuries and acute post-operative infection. Each chapter describes and summarizes the data in a consistent structure, but achieves this objective in a case-based format. Utilizing the latest literature, *Orthopedic Traumatology: An Evidence-Based Approach, Second Edition* will continue to serve as a guide for orthopedic residents and practicing physicians alike.
