

1. Record Nr.	UNINA9910300293403321
Autore	Goonewardene Sanchia S
Titolo	Prostate Cancer Survivorship // by Sanchia S. Goonewardene, Raj Persad
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer, , 2018
ISBN	3-319-65358-X
Edizione	[1st ed. 2018.]
Descrizione fisica	1 online resource (XXIII, 369 p. 26 illus. in color.)
Disciplina	616.6
Soggetti	Urology Oncology Cancer Cancer Biology
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	1. Acknowledgements -- 2. Introduction -- 3. Prostate cancer -- 4. Cancer survivorship -- 5. Prostate cancer and radical treatment -- 6. Definition of Psychosexual care and importance post-surgery for prostate cancer. 7.Barriers to psychosexual care -- 8. Impact of Psychosexual care on patient health related quality of life (QOL) -- 9. Importance of addressing psychosexual concerns -- 10. Pharmacological and non-pharmacological treatment for improved sexual function -- 11. Post treatment monitoring for recurrence - the 'usual pathway -- 12. Current follow-up care pathway vs. a new 'psychosexual' pathway -- 13. Current prostate cancer survivorship care pathways -- 14. Impact of Acute and chronic co-morbidities on psychosexual concerns -- 15. Barriers to psychosexual care- the 'psycho-social' part -- 16. Assessment of psychosexual concerns, health related quality of life and acute and chronic co-morbidities in patients post-surgery for prostate cancer -- 17. Psychosexual interventions -- 18. Needs, challenges and UK survivorship initiative and solutions -- 19. Needs and challenges in survivorship care -- 20. Systematic review – Requirement for care -- 21 Systematic review - search strategy -- 22. Systematic Review - eligibility and types of studies to be included -- 23. Systematic review– identifying studies,

data extraction and quality assessment of studies -- 24. Systematic review - characteristics of studies -- 25. Statement of main findings -- 26. Quality assessment of studies – systematic review -- 27. Did the studies address clearly focused issues? -- 28. Recruitment of cohorts -- 29. Tools used in assessment -- 30. Confounding factors and alteration of study design for studies in systematic review -- 31. Unmet needs and psychosexual concerns -- 32. Medical components of psychosexual pathways- medications and erectile devices -- 33. Medical components of psychosexual pathways- intracavernosal injection therapy and penile prostheses -- 34. Requirement for psychosexual pathways -- 35. Communication and support -- 36. Psychosexual concerns and time since procedure -- 37. Patient age, co-morbidities and psychosexual concerns -- 38. Psychosexual impairment, degree of surgery and erectile aids -- 39. Psychosexual care and quality of life -- 40. Psychosexual care and Integration back into society -- 41. Strengths and limitations- systematic review -- 42. Findings in relation to other psychosexual studies and trends in literature – systematic review -- 43. Current systematic reviews relating to systematic review -- 44. Psychosexual care and unmet need, Requirements for a psychosexual pathway and components of pathways -- 45. Psychosexual care and role of couple -- 46. Interventions on psychosexual concerns -- 47. Statement of main findings and specific areas of unmet needs arising from systematic review -- 48. Systematic review – conclusion -- 49. Follow-up pathway structures -- 50. Research methods in survivorship -- 51. Patient focus group results -- 52. Healthcare professional focus group results -- 53. Generation of themes -- 54. Survivorship care an unmet need -- 55. A new model of care -- 56. Areas to address in psychosexual care and survivorship -- 57. The future for survivorship care -- 58. Impact of psychosexual care on uro oncology -- 59. Impact of acute and chronic co-morbidities on survivorship -- 60. Assessment of psychosexual concerns, health related quality of life and acute and chronic co-morbidities in patients post-surgery for prostate cancer -- 61. Psychosexual interventions in survivorship care -- 62. Psychosexual care – the literature -- 63. Current NHS care -- 64. Unmet needs -- 65. The Worcestershire Prostate cancer database -- 66. The Prostate Cancer Survivorship care assessment tool -- 67. Role of patient conferences in current care -- 68. Prostate cancer survivorship- a systematic review -- 69. Medical requirements in survivorship -- 70. Sexual impairment in survivorship -- 71. Work related symptoms and support -- 72. Diet and exercise -- 73. Survivorship Interventions -- 74. Development of survivorship interventions -- 75. Survivorship studies, methods of follow-up -- 76. Survivorship needs -- 77. Lack of care -- 78. Exercise and nutrition -- 79. Communication and families -- 80. Areas of care to be developed -- 81. Mixed methods research -- 82. Symptom control in survivorship care -- 83. Ongoing health needs -- 84. Medical requirements in survivorship -- 85. Work related symptoms -- 86. Medical care and communication -- 87. Psychosexual impairment and adjuvant therapy -- 88. Psychosexual care- what the literature says -- 89. Systematic review- diet and exercise therapy -- 90. UK diet and exercise studies -- 91. Medical requirements in survivorship -- 92. Diet and exercise- is it important? -- 93. Diet and exercise interventions -- 94. Patient diet and exercise needs.

---

## Sommario/riassunto

This book provides information on a range of issues related to prostate cancer survivorship, including; psychosexual care, health related quality of life, treatment, follow-up care, new psychosexual pathways, and acute and chronic co-morbidities. The book also covers the needs and challenges in survivorship care, the requirements of care, the future of

survivorship care, and role of patient conferences. This book aims to give oncologists, urologists, and specialist nurses help in how to manage patients in the prostate cancer survivorship phase. This guidance is based on real life experiences handling prostate cancer survivorship, and is developed further through utilising the views of both health care professionals and patients.
