

1. Record Nr.	UNINA9910300313803321
Autore	Corcos Jacques
Titolo	Consultation in Neurourology : A Practical Evidence-Based Guide // by Jacques Corcos, Mikolaj Przydacz
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer, , 2018
ISBN	3-319-63910-2
Edizione	[1st ed. 2018.]
Descrizione fisica	1 online resource (XVI, 312 p. 69 illus., 47 illus. in color.)
Disciplina	616.6
Soggetti	Urology Neurology Neurology
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Book Presentation with Overview of Bladder Physiology -- Neurogenic Bladder Pathophysiology -- Pathologies Responsible for the Development of the Neurogenic Bladder -- Medical History and Physical Examination -- Testing -- Bladder Management and Follow-up Plan -- Incontinence Due to Neurogenic Detrusor Overactivity -- Retention -- Incontinence Due to Neurogenic Sphincter Deficiency -- Urinary Tract Infection -- Urolithiasis -- Hydronephrosis -- Renal Failure -- Autonomic Dysreflexia -- Other (Bladder Cancer, Sexual Dysfunction) -- Benign Prostate Hyperplasia and Neurogenic Bladder -- Patient Education -- Reports and Guidelines on Neurogenic Bladder.
Sommario/riassunto	This book is aimed to bring the reader into the heart of the action of any health professional consulted for a patient with a neurogenic bladder (NB). Extensive textbooks of the NB exist but there is a lack of an actual practical guide for diagnosis and management of patients suffering from NB. This book provides a single source of information on consultation in neurourology. The text covers both urinary incontinence and retention resulting from NB dysfunction. The book also discusses complications of NB which include urinary tract infections, hydronephrosis, renal failure or autonomic dysreflexia. Sections address these clinical issues faced by physicians. This book provides a useful guide with comprehensive and practical instructions

for all practitioners dealing with NB in their day-to-day clinical practice. It will serve as a valuable resource for those with a special interest in NB. The book reviews new data about diagnostic and management options. It also provides a concise yet comprehensive summary of the current NB guidelines from different societies. All chapters include the most up to date scientific and clinical information with the relevant level of clinical evidence and grade of recommendation.
