

1. Record Nr.	UNINA9910300321203321
<b>Titolo</b>	Clinical Cases in Coronary Rotational Atherectomy : Complex Cases and Complications // edited by Reginald Low, Khung Keong Yeo
<b>Pubbl/distr/stampa</b>	Cham : , : Springer International Publishing : , : Imprint : Springer, , 2018
<b>ISBN</b>	3-319-60490-2
<b>Edizione</b>	[1st ed. 2018.]
<b>Descrizione fisica</b>	1 online resource (XI, 200 p. 208 illus., 50 illus. in color.)
<b>Collana</b>	Clinical Cases in Interventional Cardiology, , 2522-5189
<b>Disciplina</b>	617.412
<b>Soggetti</b>	Cardiology Interventional radiology Interventional Radiology
<b>Lingua di pubblicazione</b>	Inglese
<b>Formato</b>	Materiale a stampa
<b>Livello bibliografico</b>	Monografia
<b>Nota di contenuto</b>	Basic equipment and set-up -- Preparation and patient optimization -- Changing burrs -- Basic rotablator case -- Ostial RCA case -- Ostial LM case -- Ostial LAD case -- Ostial Circ Case -- Long segment disease case -- 'Small' vessel case -- Severe calcification -- Tortuosity case -- CTO case -- STEMI case -- Wiring with rota wire -- Advancing rota wire while rotablasting -- Rotablator through under-expanded stent -- Rotablator through LIMA -- Rotablator through SVG -- Rotablator and angiosculpt -- Rotablator and cutting balloon -- Rotablator through stent accordion -- Rotablator through LM stent -- Complication: sheared-off wire -- Complication: sheared-off wire -- Complication: burr perforation -- Complication: stuck burr -- Complication: no reflow -- Complication: fractured burr -- Complication: fractured rota-wire.
<b>Sommario/riassunto</b>	This book describes and reviews a multitude of different scenarios in coronary rotational atherectomy. This technique is an integral tool in the coronary interventionist's armamentarium and is essential in complex coronary interventions. Its use has grown more widespread over the last few years with interventional cardiologists tackling previously 'untreatable' coronary lesions. This has made it ever more important that interventionists and all involved in the management of patients undergoing this procedure should be given practical

information on best practice. Clinical Cases in Coronary Rotational Atherectomy contains over 25 clinical scenarios that reveal the wide extent of patient types, cardiovascular pathology and potential outcomes that the interventionist can experience with it. The book will therefore be of great value to interventional cardiologists, general cardiologists and cardiac surgeons, and all involved in the management of patients undergoing this procedure.
