

1. Record Nr.	UNINA990009583340403321
Autore	Sabato, Giovanni
Titolo	Come provarlo? : la scienza indaga sui diritti umani / Giovanni Sabato ; prefazione di Marcello Flores
Pubbl/distr/stampa	Roma ; Bari : Laterza, 2010
ISBN	978-88-420-9267-4
Descrizione fisica	VIII, 212 p. ; 18 cm
Collana	Universale Laterza ; 903
Disciplina	323.015
Locazione	FSPBC
Collocazione	Collez. 114 (903)
Lingua di pubblicazione	Italiano
Formato	Materiale a stampa
Livello bibliografico	Monografia

2. Record Nr.	UNINA9910300330503321
Titolo	Imaging spine after treatment : a case-based atlas / / Tommaso Scarabino, Saverio Pollice, editors ; foreword by Carlo Faletti ; in collaboration with Paola D'Aprile [and ten others]
Pubbl/distr/stampa	Milan : , : Springer, , 2014
ISBN	88-470-5391-9
Edizione	[1st ed. 2014.]
Descrizione fisica	1 online resource (xxv, 295 pages) : illustrations (some color)
Collana	Gale eBooks
Disciplina	616.730757
Soggetti	Spine - Imaging
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	1. Pathology -- 2. Interventional Radiology -- 3. Surgery -- 4. Imaging Modalities -- 5. Post Treatment -- 6. Clinical cases.
Sommario/riassunto	This book reviews in detail the role of neuroradiological imaging in the evaluation of patients who have undergone surgery or interventional radiology procedures, and particularly its value in the documentation of normal and pathological post-treatment changes, detection of complications, and follow-up. The opening sections describe pretreatment images in various conditions, including trauma, degenerative disc disease, and osteoporosis, and the different types of neurosurgical and interventional treatment that may be used. The post-treatment appearances of normal sequelae and complications on conventional radiography, CT, and MRI are then documented in detail on the basis of a large series of clinical cases, with a wealth of images. Guidance is provided on selection of one or a combination of imaging modalities. This book will be an invaluable clinical and research tool not only for neuroradiologists but also for neurosurgeons, and interventional radiologists.
