

1. Record Nr.	UNINA9910300332803321
Titolo	Whiplash Injuries : Diagnosis and Treatment // edited by Dario C. Alpini, Guido Brugnoli, Antonio Cesarani
Pubbl/distr/stampa	Milano : , : Springer Milan : , : Imprint : Springer, , 2014
ISBN	88-470-5486-9
Edizione	[2nd ed. 2014.]
Descrizione fisica	1 online resource (393 p.)
Disciplina	617.53044
Soggetti	Medical rehabilitation Otolaryngology Rehabilitation Medicine Otorhinolaryngology
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index at the end of each chapters.
Nota di contenuto	Part I General Aspects -- Part II Pathophysiology -- Part III Evaluation -- Part IV Treatment.- Part V Conclusive remarks.
Sommario/riassunto	The new edition of this book provides an up-to-date and comprehensive overview of whiplash-associated disorders, focusing in particular on a functional approach to clinical and instrumental diagnosis and rehabilitative treatment. It fully reflects the changes in our understanding of whiplash injuries since the first edition, and in particular the increased awareness that whiplash is a whole-body trauma in which forces act progressively from the lumbar region to the brain, through the cervical spine. Detailed attention is paid to the functional connections between the sense organs of the inner ear, the sympathetic system, and the spine with a view to optimizing diagnosis and treatment. It is explained how various treatment options can be employed to best effect in patients with different symptoms, following, but updating, the well-known Quebec Task Force guidelines. Underestimated aspects such as positional vertigo, somatic tinnitus, temporomandibular disorders, and back pain are also considered. This book will be an invaluable tool in everyday clinical practice for all who are involved in the diagnosis and treatment of whiplash injury.
