Interrogating gendered silences in urban policy: regionalism and alternative visions of a caring region; Introduction; Socio-spatial imaginaries through a feminist lens; The neoliberalized urban region

Challenging a dominant paradigm: growth in the Toronto region

## Sommario/riassunto

<P>In <I>Rethinking Feminist Interventions into the Urban,</I> Linda Peake and Martina Rieker embark on an ambitious project to explore the extent to which a feminist re-imagining of the twenty-first century city can form the core of a new emerging analytic of women and the neoliberal urban.</P><P>In a world in which the majority of the population now live in urban centres, they take as their starting point the need to examine the production of knowledge about the city through the problematic divide of the global north and south, asking what might a feminist intervention, a position itself fra

Sommario/riassunto	This atlas presents a comprehensive outline of neuromuscular diseases, written by respected American and European authors. It discusses all aspects of neuromuscular disorders including cranial and spinal nerves, motor neuron diseases, nerve plexus, peripheral nerves, mono- and polyneuropathies, entrapment syndromes, neuromuscular junctions, and muscle disease. Each chapter is structured into the following sections: anatomy, symptoms, signs, pathogenesis, diagnosis and

differential diagnosis, therapy and prognosis. The diagnostic tools in neuromuscular disease are explained and practical guidelines are offered on how to advance from symptoms to syndromes. The therapeutic options for each disease are also described. In this new edition, the structure of the chapters has been reorganized and chapters on principles of peripheral nerves, nerve pain, nerve surgery and rehabilitation have been added. The current trend of increased use of imaging techniques such as US and MRI in the diagnosis and follow-up of neuromuscular disorders is also reflected.
