

1. Record Nr.	UNINA9910300344303321
Titolo	Kidney Development in Renal Pathology // edited by Gavino Faa, Vassilios Fanos
Pubbl/distr/stampa	New York, NY : , : Springer New York : , : Imprint : Humana, , 2014
ISBN	1-4939-0947-9
Edizione	[1st ed. 2014.]
Descrizione fisica	1 online resource (115 p.)
Collana	Current Clinical Pathology, , 2197-7828
Disciplina	616.61
Soggetti	Pathology Nephrology Urology Medicine - Research Biology - Research Biomedical Research
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Development of the Human Kidney: Morphological Events -- Molecular Regulation of Kidney Development -- Development of the the Human Kidney: Immunohistochemical Findings -- Kidney Development: New Insights on Transmission Electron Microscopy -- The Human Kidney at Birth: Structure and Function in Transition -- Perinatal Asphyxia and Kidney Development -- Lessons on Kidney Development from Experimental Studies -- Do -Thymosins Play a Role in Human Nephrogenesis? -- Malnutrition and Renal Function.
Sommario/riassunto	This volume provides a comprehensive, state-of-the art review in the field of experimental and human nephrogenesis. The book reviews new data on the effects on kidney development by neonatal asphyxia, obstructive uropathies, nephrotoxic drugs, malnutrition, underfeeding, overfeeding, and provides all possible preventive measures to ensure the well-being of the kidney at birth. The book also discusses the possible implications between renal development and the insurgence of kidney disease in adult life, and the correlation with renal carcinogenesis. Written by well recognized experts in their fields, Kidney Development in Renal Pathology is a valuable tool for

pathologists, neonatologists, nephrologists, gynecologists, and
researchers with an interest in kidney diseases.
