Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Bibliographic Level Mode of Issuance: Monograph
Nota di bibliografia	Includes bibliographical references.
Sommario/riassunto	The national report of civil procedure in Latvia is based on review of the Latvian Civil Procedure Law, court practice, feedback by the Ministry of Justice on cooperation with the EU states as well as with third countries in various matters of jurisdiction as well as on legal science. Civil procedure includes all legal principles like disposition, right to be present and to be heard, competition of parties in gaining all necessary evidence and similar concepts to be found in almost every modern civil procedure system. However, there are certain specific features due to which Latvian process stands out. For instance, there is still a system of legal presumptions which apparently is inherited from Roman law, yet still prescribed by the Latvian Civil law (Civil code). Also certain degree of formal attitude remains as a characteristic feature of the Latvian civil procedure.

2. Record Nr.	UNINA9910300347303321
Titolo	Pathology of the Ovary, Fallopian Tube and Peritoneum // edited by Nafisa Wilkinson
Pubbl/distr/stampa	London : , : Springer London : , : Imprint : Springer, , 2014
ISBN	1-4471-2942-3
Edizione	[1st ed. 2014.]
Descrizione fisica	1 online resource (524 p.)
Collana	Essentials of Diagnostic Gynecological Pathology
Disciplina	610 616.07 616994 618.1

Sommario/riassunto	As the second volume in the Essentials of Diagnostic Gynecological

Pathology series sponsored by the British Association of Gynecological Pathologists, Pathology of the Ovary, Fallopian Tube and Peritoneum is one of the very few dealing wholly with this subject. Pathology of the Ovary, Fallopian Tube and Peritoneum introduces the topic with a discussion of the anatomy, development, histology and normal function of the ovary, followed by chapters on non-neoplastic disorders of the ovary; surgery and medical management of ovarian cancer; and the use of imaging, frozen sections and cytology in ovarian pathology. The book then goes on to describe specific disorders of the ovary, fallopian tube and peritoneum in detail, and finishes with a chapter on specimen cut-up. Pathology of the Ovary, Fallopian Tube and Peritoneum has been written to be useful diagnostically to general as well as specialist gynecological histopathologists and pathologists in training. Gynecologists, oncologists, genitourinary physicians and cancer nurse specialists will find expert insights here that will help in treatment and counselling of their patients.
