

1. Record Nr.	UNINA9910300347503321
Autore	Builov Vladimir M
Titolo	Imaging of Urinary Tract Diverticula // by Vladimir M. Builov
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer, , 2014
ISBN	3-319-05383-3
Edizione	[1st ed. 2014.]
Descrizione fisica	1 online resource (117 p.)
Disciplina	610 616.0757 616.6 616.60754
Soggetti	Radiology Urology Diagnostic Radiology Imaging / Radiology
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	Introduction -- Diverticula of the renal tumours of the kidneys.- Ureteral Diverticula.- Bladder Diverticula -- Urethral Diverticula -- Opinion -- Appendix 1: The recommendations of the European society of urogenital Radiology (ESUR) on the safe use of contrast media, version 8.1 -- Appendix 2: The recommendations of the European Medicines Agency to minimise the risk of systemic nephrogenic fibrosis in application of contrast medium containing gadolinium.
Sommario/riassunto	This monograph covers all aspects of the radiologic diagnosis of urinary tract diverticula, including calyceal, ureteral, bladder, and urethral diverticula. Characteristic and subtle diagnostic features are identified with the aid of numerous high-quality ultrasound, X-ray, and magnetic resonance images, the vast majority of which are drawn from the author's personal clinical practice. In addition, issues relating to terminology, classification, statistics, etiology, pathogenesis, clinical presentation, and differential diagnosis are discussed. The text is complemented by two helpful appendices that document the latest recommendations of the European Society of Urogenital Radiology

regarding use of contrast media and the European Medicines Agency on minimizing the risk of nephrogenic systemic fibrosis when using gadolinium-containing contrast agents. This book will be of value for specialists in radiology and urology and also trainees and medical students. .
