

1. Record Nr.	UNINA9910300349503321
Titolo	Acute Care for Elders : A Model for Interdisciplinary Care // edited by Michael L. Malone, Elizabeth A. Capezuti, Robert M. Palmer
Pubbl/distr/stampa	New York, NY : , : Springer New York : , : Imprint : Humana, , 2014
ISBN	1-4939-1025-6
Edizione	[1st ed. 2014.]
Descrizione fisica	1 online resource (276 p.)
Collana	Aging Medicine
Disciplina	618.97
Soggetti	Geriatrics Primary care (Medicine) Nursing Social work Geriatrics/Gerontology Primary Care Medicine Social Work
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index at the end of each chapters.
Nota di contenuto	An Introduction to the Acute Care for Elders -- The Team Approach to Interdisciplinary Care -- Patient and Hospital Factors that Lead to Adverse Outcomes in Hospitalized Elders -- An Overview of Hospital-Based Models of Care -- The Acute Care for Elders Unit -- How to Develop, Start and Sustain an Acute Care for Elders Unit -- How to Disseminate the ACE Model of Care Beyond One Unit -- How to Use the ACE Unit to Improve Hospital Safety and Quality for Older Patients: From ACE Units to Elder-Friendly Hospitals -- ACE Unit Business Model -- Models of Care to Transition from Hospital to Home -- What is the Role of Hospitalists in the Acute Care for Elders -- How to Improve Care for Seniors in the Emergency Department -- How to Improve Care for Older Patients in the Intensive Care Unit -- The Future of Acute Care for Elders.
Sommario/riassunto	Acute Care for Elders (ACE) is a model of care designed to improve functional outcomes and to improve the processes for the care of older patients. This model includes: an environment of care designed to

promote improved function for older patients; an interdisciplinary team that works together to identify/address the vulnerabilities of the older patients; nursing care plans for prevention of disability; early planning to help prepare the patient to return home; and a review of medical care to prevent iatrogenic illness. *Acute Care for Elders: A Model for Interdisciplinary Care* is an essential new resource aimed at assisting providers in developing and sustaining an ACE program. The interdisciplinary approach provides an introduction to the key vulnerabilities of older adults and defines the lessons learned from the Acute Care for Elders model. Expertly written chapters describe critical aspects of ACE: the interdisciplinary approach and the focus on function. The fundamental principles of ACE described in this book will further assist hospital leaders to develop, implement, sustain and disseminate the Acute Care for Elders model of care. *Acute Care for Elders: A Model for Interdisciplinary Care* is of great value to geriatricians, hospitalists, advance practice nurses, social workers and all others who provide high quality care to older patients.
