

1. Record Nr.	UNINA9910300350003321
Titolo	Innovations in HIV Prevention Research and Practice through Community Engagement / / edited by Scott D. Rhodes
Pubbl/distr/stampa	New York, NY : , : Springer New York : , : Imprint : Springer, , 2014
ISBN	1-4939-0900-2
Edizione	[1st ed. 2014.]
Descrizione fisica	1 online resource (274 p.)
Disciplina	301 362.1969792 610 613
Soggetti	Medicine, Preventive Health promotion Sociology Clinical health psychology Health Promotion and Disease Prevention Health Psychology
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references at the end of each chapters and index.
Nota di contenuto	Authentic community engagement and community-based participatory research for public health and medicine -- HIV prevention in a rural community: Multigenerational community engagement.-Preventing HIV among black men in college using a CBPR approach -- Gay community involvement in prevention: Where we have been, where we are, and where we should be going -- HIV prevention interventions with adolescents: Innovations and challenges in partnerships across the integrated transitions model -- Community engagement and HIV prevention with American Indian communities: Working with the whole person -- Applying a CBPR approach to prevent HIV within ethnic, sexual, and gender minority communities: A partnership's successes with sustainability -- Community involvement in policy interventions -- Communities and technology: Enhancements in HIV prevention research and practice among youth and young adults -- Employment

as a social determinant of health: An urban partnership's experience with intervention development and implementation using CBPR.- Dissemination, implementation, and adaptation of evidence-based behavioral HIV prevention interventions through community engagement: The CDC experience.

Sommario/riassunto

HIV continues to be a profound challenge facing communities nationally and internationally. Until a vaccine or a cure is found, prevention remains a most crucial line of defense. However, the successes made to reduce exposure and transmission have not benefited all communities equally. HIV continues to affect vulnerable communities, and HIV-related health disparities are growing. The work documented in *Innovations in HIV Prevention Research and Practice through Community Engagement* spotlights the effectiveness of community involvement to reduce HIV infections in the United States. This timely resource introduces the concepts of community engagement, partnership, and community-based participatory research (CBPR). Contributors provide detailed examples of these concepts in which diverse research partners blend their unique insights and skills to arrive at an authentic understanding of phenomena and inform the translation of best practices and processes to enhance equity in HIV prevention and treatment. Equitable interactive collaboration is central to these efforts, in which community members and representatives from organizations, the scientific and medical sectors, and other relevant agencies nurture long-term health improvement through sustained teamwork. Challenges and barriers to effective engagement are identified, as are characteristics of successful partnerships. Included in the book: Details of a multigenerational HIV prevention intervention in a rural southeastern community. The challenges and successes of developing, implementing, and evaluating an intervention for higher-risk predominately heterosexual black men in college. The history of gay community involvement in HIV prevention and its contributions to the theory and current practice of engagement. Next steps in the integration of HIV-related policy change and research. Community engagement within American Indian communities. Keys to sustaining a CBPR partnership to prevent HIV within ethnic, sexual, and gender minority communities. *Innovations in HIV Prevention Research and Practice through Community Engagement* offers researchers and practitioners in public health, community health, and medicine guidance on community engagement that is both inspiring and realistic. "Community engagement and knowledge continue to be essential to prevent HIV infections. This book is a compilation of the state-of-the-science of engagement and delves deeper into the meaning and utilization of community-based participatory research, with implications that reach beyond the HIV epidemic to public health and medicine in general." - Laura C. Leviton, PhD, Senior Advisor for Evaluation, Robert Wood Johnson Foundation, Princeton, NJ
