

1. Record Nr.	UNINA9910300354803321
Autore	Perez-Ruiz Fernando
Titolo	Managing Gout in Primary Care / / by Fernando Perez-Ruiz, Ana Maria Herrero-Beites
Pubbl/distr/stampa	Tarporley : , : Springer Healthcare Ltd. : , : Imprint : Springer Healthcare, , 2014
ISBN	1-907673-67-9
Edizione	[1st ed. 2014.]
Descrizione fisica	1 online resource (78 p.)
Disciplina	616.3999
Soggetti	Rheumatology Chemotherapy Orthopedics Pharmacotherapy
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references at the end of each chapters.
Nota di contenuto	Disease Overview -- Physiopathology of Gout -- Diagnosis of Gout -- Treatment of Hyperuricemia in Gout -- Prevention and Treatment of Inflammation in Gout -- Appendix.
Sommario/riassunto	This handbook discusses developments and the future of gout treatment, which looks promising. Gout has been a well-known disease for over 2000 years, and is the most common cause of joint inflammation in adult males. It has become apparent that no therapeutic target based on hyperuricemia outcome had been defined. Very few controlled trials were available to test the efficacy and safety of treatments, and no research on diagnosis and management had been done despite data showing that patients with gout were generally improperly treated even in the hands of specialists. In the last 10 years, good-quality evidence on gout impact and management has grown exponentially, renal transporters have been recently identified, and a number of new drugs have been approved or are under current development.
