

1. Record Nr.	UNINA9910300356103321
Titolo	Viruses and Human Cancer // edited by S. David Hudnall
Pubbl/distr/stampa	New York, NY : , : Springer New York : , : Imprint : Springer, , 2014
ISBN	1-4939-0870-7
Edizione	[1st ed. 2014.]
Descrizione fisica	1 online resource (393 p.)
Disciplina	616.994
Soggetti	Pathology Oncology Communicable diseases Infectious Diseases
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references at the end of each chapters and index.
Nota di contenuto	Preface -- Human Cancer Virology: An Historical Review -- Epstein Barr Virus: Pathogenesis and Host Immune Response -- Epstein Barr Virus: Epidemiology and Clinical Features of Related Cancer -- Hepatitis C Virus: Pathogenesis and Host Immune Response -- Hepatitis C Virus: Epidemiology and Clinical Features of Related Cancer -- Hepatitis B Virus: Pathogenesis and Host Immune Response -- Hepatitis B Virus: Epidemiology and Clinical Features of Related Cancer -- Human Papillomavirus: Pathogenesis and Host Immune Response -- Human Papillomavirus: Epidemiology and Clinical Features of Related Cancer -- Human T-cell Leukemia Virus Type 1: Pathogenesis and Host Immune Response -- Human T-cell Leukemia Virus Type 1: Epidemiology and Clinical Features of Related Cancer -- Kaposi's Sarcoma-associated Herpesvirus: Pathogenesis and Host Immune Response -- Kaposi's Sarcoma-associated Herpesvirus: Epidemiology and Clinical Features of Related Cancer -- Merkel Cell Polyomavirus: Pathogenesis and Host Immune Response -- Merkel Cell Polyomavirus: Epidemiology and Clinical Features of Related Cancer -- Appendix: Pathology of Virus-associated Tumors.
Sommario/riassunto	Viruses and Human Cancer provides a comprehensive review of the seven currently known human tumor viruses and their associated

cancers with an emphasis on epidemiology, clinicopathologic features, and pathogenesis. Chapters are written by internationally recognized experts, and all are generously illustrated with tables, diagrams, and photographic images. *Viruses and Human Cancer* serves as a concise review of the field of human tumor virology for virologists, pathologists, oncologists and infectious disease specialists. It is of great value to practicing physicians, residents and clinical fellows in these specialties.
