1. Record Nr. UNINA9910300403703321

Titolo	29th International Symposium on Shock Waves 2 : Volume 2 / / edited by Riccardo Bonazza, Devesh Ranjan
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer, , 2015
ISBN	3-319-16838-X
Edizione	[1st ed. 2015.]
Descrizione fisica	1 online resource (822 p.)
Disciplina	530
Soggetti	Continuum physics Thermodynamics Heat engineering Heat transfer Mass transfer Fluid mechanics Classical and Continuum Physics Engineering Thermodynamics, Heat and Mass Transfer Engineering Fluid Dynamics
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references at the end of each chapters and indexes.
Nota di contenuto	Part XI Magnetohydrodynamics -- Part XII Medical and Biological Applications -- Part XIII Nozzle Flow -- Part XIV Numerical Methods -- Part XV Plasmas -- Part XVI Propulsion -- Part XVII Richtmyer-Meshkov Instability -- Part XVIII Shock-Boundary Layer Interaction -- Part XIX Shock Propagation and Reflection -- Part XX Shock-Vortex Interaction -- Part XXI Shock Waves in Condensed Matter -- Part XXII Shock Waves in Multiphase Flow -- Part XXIII Shock Waves in Rarefied Flow.
Sommario/riassunto	This proceedings present the results of the 29th International Symposium on Shock Waves (ISSW29) which was held in Madison, Wisconsin, U.S.A., from July 14 to July 19, 2013. It was organized by the Wisconsin Shock Tube Laboratory, which is part of the College of Engineering of the University of Wisconsin-Madison. The ISSW29 focused on the following areas: Blast Waves, Chemically Reactive Flows,

Detonation and Combustion, Facilities, Flow Visualization, Hypersonic Flow, Ignition, Impact and Compaction, Industrial Applications, Magnetohydrodynamics, Medical and Biological Applications, Nozzle Flow, Numerical Methods, Plasmas, Propulsion, Richtmyer-Meshkov Instability, Shock-Boundary Layer Interaction, Shock Propagation and Reflection, Shock Vortex Interaction, Shock Waves in Condensed Matter, Shock Waves in Multiphase Flow, as well as Shock Waves in Rarefield Flow. The two Volumes contain the papers presented at the symposium and serve as a reference for the participants of the ISSW 29 and individuals interested in these fields.
