

1. Record Nr.	UNINA9910300410803321
Autore	Vishveshwara C. V
Titolo	Universe Unveiled : The Cosmos in My Bubble Bath // by C. V. Vishveshwara
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer, , 2015
ISBN	3-319-08213-2
Edizione	[1st ed. 2015.]
Descrizione fisica	1 online resource (244 p.)
Collana	Astronomers' Universe, , 1614-659X
Disciplina	520 530.01
Soggetti	Astronomy Astrophysics Physics Popular Science in Astronomy Astronomy, Astrophysics and Cosmology History and Philosophical Foundations of Physics
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di contenuto	The Journey begins -- The Astral Guide -- Ancient Times -- Family Circles -- Hven and the Heavens -- The Starry Messenger -- The Fall and the Firmament -- The Familiar Wanderers -- Hidden Worlds -- Life of Stars -- Our Own Galaxy -- The Universe: Expanse and Expansion -- Unveiling the Universe.
Sommario/riassunto	The bubbles were swirling all around me, massaging my body. As I luxuriated in this fantastic bath, I gasped realizing that those bubbles carried with them miniature galaxies bringing the entire Cosmos into my bathtub... Alfie is back. And so are George and other characters from the author's previous book Einstein's Enigma or Black Holes in My Bubble Bath. While the present book, Universe Unveiled - The Cosmos in My Bubble Bath, is completely independent, its storyline can be considered a sequel to the previous one. The scientific content spanning ancient world models to the most recent mysteries of cosmology is presented in an entirely nontechnical and descriptive style through the discussions between Alfie, the enlightened learner, and

George, professor of astrophysics. Fantasies, based on these discussions that cover the scientific facts, are created by the magical bubble baths taken by Alfie. Universe Unveiled blends accurate science with philosophy, drama, humour, and fantasy to create an exciting cosmic journey that reads like a novel and educates as it entertains.

“Spurred by a series of mind-bending discoveries, Man’s millennial love affair with the stars has now reached fever pitch. No one writing today is better positioned to evoke the romance and beauty of these cosmic discoveries than Vishveshwara. A leading expert in Einstein’s relativity theory, he brings a lyrical voice and a poetic sensibility to this joyful task. Universe Unveiled, a unique literary creation, transports readers into believing they can actually hear the music of the spheres.”

Professor Robert Fuller, Former President, Oberlin College (USA) Author of *Somebodies and Nobodies: Overcoming the Abuse of Rank* .
