

1. Record Nr.	UNINA9910300416603321
Autore	Numai Takahiro
Titolo	Fundamentals of Semiconductor Lasers // by Takahiro Numai
Pubbl/distr/stampa	Tokyo : , : Springer Japan : , : Imprint : Springer, , 2015
ISBN	4-431-55148-4
Edizione	[2nd ed. 2015.]
Descrizione fisica	1 online resource (XIV, 289 p. 193 illus.)
Collana	Springer Series in Optical Sciences, , 0342-4111 ; ; 93
Disciplina	621.3661
Soggetti	Lasers Photonics Optical materials Electronic materials Microwaves Optical engineering Optics, Lasers, Photonics, Optical Devices Optical and Electronic Materials Microwaves, RF and Optical Engineering
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Bibliographic Level Mode of Issuance: Monograph
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Band Structures -- Optical Transitions -- Optical Waveguides -- Optical Resonators -- Fundamentals of Semiconductor Lasers -- Dynamic Single-Mode LDs -- Quantum Well LDs -- Control of Spontaneous Emission.
Sommario/riassunto	This book explains physics under the operating principles of semiconductor lasers in detail based on the experience of the author, dealing with the first manufacturing of phase-shifted DFB-LDs and recent research on transverse modes. The book also bridges a wide gap between journal papers and textbooks, requiring only an undergraduate-level knowledge of electromagnetism and quantum mechanics, and helps readers to understand journal papers where definitions of some technical terms vary, depending on the paper. Two definitions of the photon density in the rate equations and two definitions of the phase-shift in the phase-shifted DFB-LD are explained, and differences in the calculated results are indicated,

depending on the definitions. Readers can understand the physics of semiconductor lasers and analytical tools for Fabry-Perot LDs, DFB-LDs, and VCSELs and will be stimulated to develop semiconductor lasers themselves.
