1. Record Nr. UNINA9910300431703321

Autore	Evans Rhodri
Titolo	The Cosmic Microwave Background : How It Changed Our Understanding of the Universe / / by Rhodri Evans
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer, , 2015
ISBN	3-319-09928-0
Edizione	[1st ed. 2015.]
Descrizione fisica	1 online resource (212 p.)
Collana	Astronomers' Universe, , 1614-659X
Disciplina	520 523.1
Soggetti	Astronomy Cosmology Popular Science in Astronomy
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	From Kapteyn to Hubble -- George Gamow, Ralph Alpher and Robert Herman -- Penzias and Wilson and Dicke et al -- COBE -- DASI and BOOMERANG and other ground-based experiments -- WMAP -- Planck -- The Future.
Sommario/riassunto	Rhodri Evans tells the story of what we know about the universe, from Jacobus Kapteyn’s Island universe at the turn of the 20th Century, and the discovery by Hubble that the nebulae were external to our own galaxy, through Gamow’s early work on the cosmic microwave background (CMB) and its subsequent discovery by Penzias and Wilson, to modern day satellite-lead CMB research. Research results from the ground-based experiments DASI, BOOMERANG, and satellite missions COBE, WMAP and Planck are explained and interpreted to show how our current picture of the universe was arrived at, and the author looks at the future of CMB research and what we still need to learn. This account is enlivened by Dr Rhodri Evans' personal connections to the characters and places in the story.
