

1. Record Nr.	UNINA9910300445503321
Titolo	Diabetes and Aging-related Complications // edited by Sho-ichi Yamagishi
Pubbl/distr/stampa	Singapore : , : Springer Singapore : , : Imprint : Springer, , 2018
ISBN	981-10-4376-0
Edizione	[1st ed. 2018.]
Descrizione fisica	1 online resource (VIII, 212 p. 57 illus., 32 illus. in color.)
Disciplina	616.462 616.46
Soggetti	Diabetes Geriatrics Metabolism - Disorders Geriatrics/Gerontology Metabolic Diseases
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references at the end of each chapters.
Nota di contenuto	1 Diabetic Nephropathy -- 2 Diabetic Eye Disease -- 3 Diabetic Neuropathy -- 4 Diabetes and Endothelial Dysfunction -- 5 Diabetes and Vascular Calcification -- 6 Diabetes and Adipocyte Dysfunction -- 7 Diabetes and Liver Disorders -- 8 Diabetes and Alzheimer's Disease -- 9 Diabetes and Cancers -- 10 Diabetes and Osteoporosis -- 11 Diabetes and Sarcopenia -- 12 Diabetes and Frailty -- 13 Diabetes and LOH Syndrome -- 14 Diabetes and Female Sterility/Infertility -- 15 Diabetes and Periodontitis -- 16 Diabetes and Advanced Glycation End Products.
Sommario/riassunto	This book addresses why and how the aging process is accelerated under diabetes, providing valuable and comprehensive information for the management of various types of diabetes- and aging-related disorders. Since several papers have shown that average life span and healthy life expectancy are reduced in diabetic patients, especially in those with a long history of disease, the early detection and treatment of diabetes-related complications are urgently needed in order to slow the aging process and help people successfully live with diabetes. Each chapter of this book addresses a specific diabetes and aging-related

complication. The topics covered include not only diabetic vascular complications, the leading causes of morbidities and high mortality rates in both type 1 and type 2 diabetic patients, but also other aging-related complications such as Alzheimer's disease, osteoporosis, periodontitis and cancer growth and metastasis. Experts on each topic discuss the background of the aging process and methods for coping with diabetes-related complications. The book as a whole, as well as the individual chapters, offer a valuable resource for researchers and practitioners in the fields of diabetic studies, gerontology, and aging science.
