

1. Record Nr.	UNINA9910300449103321
Titolo	Getting to Good : Research Integrity in the Biomedical Sciences // edited by Arthur L. Caplan, Barbara K. Redman
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer, , 2018
ISBN	3-319-51358-3
Edizione	[1st ed. 2018.]
Descrizione fisica	1 online resource (XI, 583 p. 488 illus., 298 illus. in color.)
Disciplina	616.12
Soggetti	Cardiology Psychiatry Endocrinology Surgery Public health Endocrinology Public Health
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Chapter 1. Methodology -- Chapter 2. Policy -- Chapter 3. Reproducibility -- Chapter 4. Human Subjects Protection -- Chapter 5. Responsible Authorship -- Chapter 6. Mentor-Mentee Responsibilities and Relationships -- Chapter 7. Plagiarism -- Chapter 8. Peer Review -- Chapter 9. Research Misconduct -- Chapter 10. Whistleblowing -- Chapter 11. Conflict of Interest -- Chapter 12. Data Acquisition, Management and Transparency -- Chapter 13. International Research Involving Resource-Constrained Countries -- Appendix.
Sommario/riassunto	This book represents the first comprehensive, gold standard reader on research integrity in the biomedical sciences. Now more than ever, the responsible conduct of research (RCR) has become critically important as new technologies affect research practices in both positive and negative ways. Since learning to do science and practicing it brings researchers into contact with a vast array of ethical issues, it is critical to know the standards and how they are evolving. Indeed, research integrity requires scientists at all levels to operate ethically in a system

that supports ethical practice. This unique, foundational text covers all the relevant areas -- subject protection, research misconduct and conflict of interest as well as newly quantified concerns about research bias and non-reproducibility, as well as other unique issues. Developed by renowned experts, this compelling title discusses the full range of practices and policies that should support research that is honestly produced and disseminated. It also specifically incorporates topics noted by the National Institutes of Health as essential and required for training in RCR. *Getting to Good – Research Integrity in the Biomedical Sciences* is a major contribution to the literature on bioethics and will serve as an invaluable resource for all researchers, students, administrators and professionals interested in research ethics and integrity.
