The Art of Missing the Point: FIFA and the Control of Corruption; Dan Hough -- 15. A Case Study of an EU Procurement Process in Somalia; Peter Stiernstedt, Mark Button.

Sommario/riassunto

This book focuses on the role of norms in the description, explanation, prediction and combat of corruption. It conceives corruption as a ubiquitous problem, constructed by specific traditions, values, norms and institutions. The chapters concentrate on the relationship between corruption and social as well as legal norms, providing comparative perspectives from different academic disciplines, theoretical and methodological backgrounds, and various country-studies. Due to the nature of social norms that are embedded in personal, local, and organizational contexts, the contributions in the volume focus in particular on the individual and institutional level of analysis (micro and meso-mechanisms). The book will be of interest to students and scholars across the fields of political science, public administration, socio-legal studies and psychology.
