

1. Record Nr.	UNINA9910300512603321
Autore	Cordner Lee
Titolo	Maritime Security Risks, Vulnerabilities and Cooperation : Uncertainty in the Indian Ocean / / by Lee Cordner
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Palgrave Macmillan, , 2018
ISBN	9783319627557 3319627554
Edizione	[1st ed. 2018.]
Descrizione fisica	1 online resource (XXIII, 281 p.)
Collana	New Security Challenges, , 2731-0337
Disciplina	363.287
Soggetti	Security, International International Security Studies
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Chapter 1: Security of the Indian Ocean Maritime System.- Chapter 2: Creating an Analytical Framework: Maritime Security, Risk and Vulnerability -- Chapter 3 - The Indian Ocean Region Maritime Security Risk Context.- Chapter 4: Indian Ocean Maritime Security Strategic Risk Assessment.- Chapter 5 - Strategic Risk Assessment: Offshore Oil and Gas Safety and Security in the Indo-Pacific.- Chapter 6 - Indian Ocean Maritime Security Cooperative Arrangements -- Chapter 7: Maritime Security Risk Treatment: India, Indian Ocean Region Middle, Small and Developing States, Major External Powers.- Chapter 8: Prospects for Collective and Cooperative Maritime Security in the IOR.
Sommario/riassunto	This book uniquely employs risk and vulnerability approaches to advocate international policy options for enhancing maritime security cooperation in the Indian Ocean region. Understanding shared risks and common vulnerabilities that impact the achievement of mutual objectives in the oceanic domain present practical bases for progressing collective action. The Indian Ocean sea lanes are the world's most important thoroughfares for energy resources (oil, gas and coal) and other cargoes. Secure maritime trade routes are vital to global, regional and national economies. Further, security challenges resulting from marine environmental degradation impacted by climate change are rising. Regional and extra-regional actors need to work

more closely together to impose law and order at sea, control regional conflicts, respond to humanitarian crises and natural disasters, and conserve the marine environment. This book provides an invaluable resource for political leaders, policy advisers, academic researchers, military professionals, and students of international security and strategic studies.
