

1. Record Nr.	UNINA9910300526903321
Titolo	The International Political Economy of Oil and Gas // edited by Slawomir Raszewski
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Palgrave Macmillan, , 2018
ISBN	3-319-62557-8
Edizione	[1st ed. 2018.]
Descrizione fisica	1 online resource (XXI, 300 p. 10 illus., 8 illus. in color.)
Collana	International Political Economy Series, , 2662-2483
Disciplina	338.2728
Soggetti	Political economy Environmental policy Energy policy Energy and state Energy security Fossil fuels International Political Economy Environmental Politics Energy Policy, Economics and Management Energy Security Fossil Fuels (incl. Carbon Capture)
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references at the end of each chapters and index.
Nota di contenuto	Chapter 1. Introduction -- Chapter 2. Redefining Energy Security: The new prize in a time of Arctic petroleum resources and technological development -- Chapter 3. The Political Economy of Energy in Russia -- Chapter 4. European Gas Supply Security: Explaining the EU external gas pipeline choices -- Chapter 5. The Political Economy of Oil: The limits of our ability to prevent failure -- Chapter 6. Natural Gas and Energy Security: A view from the European Union -- Chapter 7. The Rise and Limits of the Extractive Industries Transparency Initiative -- Chapter 8. Oil and Gas Political Economy in Central Asia: The international perspective -- Chapter 9. Nascent Gas Markets in the Era of Low Oil Prices: The challenges and opportunities of energy security

in Southeast Asia -- Chapter 10. The Australian LNG Industry: Legal and commercial challenges -- Chapter 11. Converging Energy Governance in Mature Petroleum Provinces: Political, legal and economic dimensions in governing mature petroleum fields in the North Sea -- Chapter 12. Iran's Post-Sanctions Oil and Gas Management -- Chapter 13. Emerging Frontiers of Energy Exploration in Post-Boom Africa -- Chapter 14. Brazil's Management of Oil and Gas: State-centrism vs. liberalism -- Chapter 15. Shale Gas Development and Environmental Governance in China -- Chapter 16. The (New) Political Economy of Oil and Gas: The implications of the changing dominant paradigm of international energy development? -- Chapter 17. Conclusion: Transitioning from the 'old' to the 'new' political economy of oil and gas.

---

### Sommario/riassunto

'This timely book gathers a great selection of seasoned and up-and-coming scholars to present a well-rounded view on recent developments in the IPE of oil and gas. It is particularly its global outlook that will make this book a valuable source for students of energy and IPE alike.' —Andreas Goldthau, Royal Holloway, University of London, UK 'The case studies in this collected edition will be a valuable source to scholars and decision makers interested in the broader nexus of energy governance, energy security and the role of resources in development.' —Adnan Vatansever, The King's Russia Institute, King's College London, UK This book addresses energy research from four distinct International Political Economy perspectives: energy security, governance, legal and developmental areas. Energy is too important to be neglected by political scientists. Yet, within the mainstream of the discipline energy research still remains a peripheral area of academic enquiry seeking to plug into the discipline's theoretical debates. The purpose of this book is to assess how existing perspectives fit with our understanding of social science energy research by focusing on the oil and gas dimension.
