Sommario/riassunto

Print, in the early modern period, could make or break power. This volume addresses one of the most urgent and topical questions in early modern history: how did European authorities use a new medium with such tremendous potential? The eighteen contributors develop new perspectives on the relationship between the rise of print and the changing relationships between subjects and rulers by analysing print's role in early modern bureaucracy, the techniques of printed propaganda, genres, and strategies of state communication. While print is often still thought of as an emancipating and destabilizing force of change in early modern societies, the resulting picture shows how instrumental print was in strengthening existing power structures. Readership: This volume will appeal to historians of early modern print culture as well as historians of media and anyone with broad interest in early modern cultural and political history.

Sommario/riassunto	<p>This book presents more than 300 exercises, with guided solutions, on topics that span both the experimental and the theoretical aspects of particle physics. The exercises are organized by subject, covering kinematics, interactions of particles with matter, particle detectors, hadrons and resonances, electroweak interactions and flavor physics, statistics and data analysis, and accelerators and beam dynamics. Some 200 of the exercises, including 50 in multiple-choice format, derive from exams set by the Italian National Institute for Nuclear Research (INFN) over the past decade to select its scientific staff of experimental researchers. The remainder comprise problems taken from the undergraduate classes at ETH Zurich or inspired by classic textbooks. Whenever appropriate, in-depth information is provided on the source of the problem, and readers will also benefit from the inclusion of bibliographic details and short dissertations on particular topics. This</p>

book is an ideal complement to textbooks on experimental and theoretical particle physics and will enable students to evaluate their knowledge and preparedness for exams. .
