Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Introduction: ugliness, underground, queer difference -- Postpunk desires -- The language of violation -- Politically incorrect, visually incorrect -- The erotics of artificiality -- Conclusion: the negative.
Sommario/riassunto	'Ugly Differences' explores queer female sexuality's symbiotic relationship with ugliness and offers a way to see worth in ugliness as a generative category for reimagining the inhabitation of gender, sexual, and ethnic differences. Ugliness, in this work, is a multipronged concept: it equates with the disagreeable and pejorative traits that are attributed to queerness; it aligns itself with nonwhite, nonmale, and nonheterosexual physicality and experience; and it refers to anti-aesthetic textual practices, which are located in/as underground culture.

Putting It All Into Practice: Some Examples and Advice -- Chapter 8. Conclusions and Implications: Paradoxes and Principles.

Sommario/riassunto

This book offers a novel approach to understanding the complexities of communication in culturally and linguistically diverse health care contexts. It marks the culmination of two decades of research in South Africa, a context that has obvious application in a wider international climate given current globalization and migration trends. The authors draw from a large body of evidence based across different sites and illnesses, scrutinising both the language dynamics of intercultural health interactions and the perceptions and narratives of multiple participants. Including a range of theoretical, methodological and empirical considerations, the volume sheds light upon qualitative research methods and their application in the intercultural context. This book will be a valuable resource for health professionals, medical educators and language practitioners as well as students and scholars of discourse analysis and the medical humanities.
