

1. Record Nr.	UNINA9910300582703321
Autore	Minerva Francesca
Titolo	The Ethics of Cryonics : Is it Immoral to be Immortal? / / by Francesca Minerva
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Palgrave Pivot, , 2018
ISBN	3-319-78599-0
Edizione	[1st ed. 2018.]
Descrizione fisica	1 online resource (XIII, 135 p.)
Collana	Palgrave Pivot
Disciplina	363.75
Soggetti	Technology—Sociological aspects Bioethics Physical anthropology Science and Technology Studies Biological and Physical Anthropology
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	1. Introduction -- 2. Pausing Death -- 3. Resuming Life -- 4. The Death Conundrum -- 5. The Immortality Conundrum -- 6. Cryoethanasia -- 7. Cryosuspension of Pregnancy.
Sommario/riassunto	Cryonics—also known as cryopreservation or cryosuspension—is the preservation of legally dead individuals at ultra-low temperatures. Those who undergo this procedure hope that future technology will not only succeed in reviving them, but also cure them of the condition that led to their demise. In this sense, some hope that cryopreservation will allow people to continue living indefinitely. This book discusses the moral concerns of cryonics, both as a medical procedure and as an intermediate step toward life extension. In particular, Minerva analyses the moral issues surrounding cryonics-related techniques (including the hypothetical cryosuspension of fetuses as an alternative to abortion) by focusing on how they might impact the individuals who undergo cryosuspension, as well as society at large. .
