Edizione	[1st ed. 2018.]
Descrizione fisica	1 online resource (299 pages) : illustrations
Disciplina	364.4
Soggetti	Criminology Urban geography Criminology and Criminal Justice, general Urban Geography / Urbanism (inc. megacities, cities, towns)
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Introduction -- A Short History of the England and Wales National Burglary Security Initiatives -- Domestic Burglary: Burglar Responses to Target Attractiveness -- Which Security Devices Reduce Burglary? -- Household- and Area-Level Differences in Burglary Risk and Security Availability Over Time -- An Evaluation of a Research-Informed Target Hardening Initiative -- The Role of Security Devices Against Burglaries: Findings from the French Victimisation Survey -- The Role of Security in Causing Drops in Domestic Burglary -- From Project to Practice: Utilising Research Evidence in the Prevention of Crime -- Conclusions - Reducing Burglary: Summing Up -- Appendix: Data and Methodology.
Sommario/riassunto	Domestic burglary has fallen significantly over the past 20 years in many countries, but still remains a high volume crime. On top of substantial financial loss and property damage, burglary also leads to high levels of anxiety and fear of crime. The research presented in this book represents the first systematic study of what actually works in security interventions against burglary, with cross-sectional data on different regions and socio-economic population groups. This work provides an overview of the scope of the problem and what can be done about it, drawing on extensive research evidence from projects funded by the Economic and Social Research Council (ESRC) Secondary

Data Analysis Initiative (SDAI), and other sources. It reports detailed findings about which interventions are most effective for different population groups and how these measures can be implemented. It includes burglary prevention advice for homeowners, law enforcement and other public agencies, and makes recommendations for future research. In addition to being relevant to concerned citizens, police, policy-makers and crime prevention practitioners, this book will also be of interest to researchers in criminology and criminal justice, particularly those working on security and crime prevention, as well as urban planning and public policy.
