Titolo	A companion to Latin American philosophy [[electronic resource] /] / edited by Susana Nuccetelli, Ofelia Schutte, and Otavio Bueno
Pubbl/distr/stampa	Chichester, U.K. ; ; Malden, MA, : Wiley-Blackwell, 2010
ISBN	1-78268-472-7 1-283-20470-3 9786613204707 1-4051-9707-2 1-4443-1484-X 1-4443-1485-8
Descrizione fisica	1 online resource (571 p.)
Collana	Blackwell companions to philosophy
Altri autori (Persone)	NuccetelliSusana SchutteOfelia BuenoOtavio
Disciplina	199.8
Soggetti	Philosophy, Latin American Philosophy - Latin America
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	A Companion to LatinAmerican Philosophy; Contents; Contributors; Acknowledgments; Introduction; Part I Historical Perspectives; 1 Pre-Columbian Philosophies; 2 The Rights of the American Indians; 3 Colonial Thought; 4 The Emergence and Transformation of Positivism; 5 Early Critics of Positivism; 6 The Anti-Positivist Movement in Mexico; 7 Darwinism; 8 Krausism; 9 'Normal' Philosophy; 10 Ortega y Gasset's Heritage in Latin America; 11 Phenomenology; 12 Marxism; 13 Liberation Philosophy; 14 Analytic Philosophy; Part II Current Issues; 15 Paraconsistent Logic; 16 Language and Colonization 17 Ethnic-Group Terms18 Identity and Latin American Philosophy; 19 Latinos on Race and Ethnicity:Alcoff, Corlett, and Gracia; 20 Mestizaje and Hispanic Identity; 21 Liberation in Theology, Philosophy,and Pedagogy; 22 Philosophy, Postcoloniality,and Postmodernity; 23 Globalization and Latin American Thought; Part III Disciplinary Developments; 24 Latin American Philosophy; 25 Contemporary Ethics

and Political Philosophy; 26 Philosophy of Science; 27 Philosophy and Latin American Literature; 28 Feminist Philosophy; 29 Teaching Philosophy; 30 Cultural Studies
 31 Deontic Logic and Legal Philosophy 32 Metaphysics; 33 Epistemology; 34 Formal Epistemology and Logic; Part IV Biographical Sketches; 35 Some Great Figures; 36 From Philosophy to Physics, and Back; Index

Sommario/riassunto	This comprehensive collection of original essays written by an international group of scholars addresses the central themes in Latin American philosophy. Represents the most comprehensive survey of historical and contemporary Latin American philosophy available today. Comprises a specially commissioned collection of essays, many of them written by Latin American authors. Examines the history of Latin American philosophy and its current issues, traces the development of the discipline, and offers biographical sketches of key Latin American thinkers. Showcases the diverse

Sommario/riassunto

The design and operation of buildings must be aligned with the drive to low energy and net zero carbon targets, including the UK's legal obligation under the Climate Change Act 2008 to reach net zero carbon

by 2050. A key part in meeting this obligation involves nearly eliminating the carbon emissions associated with, and reducing energy usage and losses in, all aspects of the built environment. Greater electrification of building services, coupled with energy efficiency and a low carbon electricity supply system, is one of the key solutions, but brings the need for new and enhanced guidance for effective delivery. The increased electrification of building will have significant implications for the design and operation of buildings and their technical services systems. Electricity is currently much more expensive than fossil fuels at the point of use in part because it carries the costs of grid decarbonisation. This may change in the future, in the meantime this could run the risk of heavy increases in energy bills without well-considered design. This Technical Memorandum provides initial guidance pertinent to the design and operation of building electrical services that focus on the drive to net zero carbon, and to start to raise the understanding and knowledge of all engineers involved in the design process around the implications of this. It is important for engineers to remain up to date on best practice and the emergence of new technologies, systems and protocols to facilitate effective and safe design and operation of buildings and communities. This paper highlights key areas where further guidance and research will be required, and where engineers need to be aware of emerging practices, and the future evolution in the guidance.

3. Record Nr.	UNINA9910303447003321
Autore	Mitrea Dorina
Titolo	Distributions, Partial Differential Equations, and Harmonic Analysis / / by Dorina Mitrea
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer, , 2018

Nota di contenuto	Introduction -- Summary of Topological and Functional Analysis Results -- Weak Derivatives -- The Space $D_0()$ of Distributions -- The Fourier Transform -- The Space of Tempered Distributions -- Fundamental Solution -- The Laplace Operator -- The Heat Operator -- The Wave Operator -- The Lamé Operator -- Fundamental Solutions for Other Operators -- Hypoelliptic operators -- Sobolev spaces -- Appendix -- References. .
Sommario/riassunto	The aim of this book is to offer, in a concise, rigorous, and largely self- contained manner, a rapid introduction to the theory of distributions and its applications to partial differential equations and harmonic analysis. The book is written in a format suitable for a graduate course spanning either over one-semester, when the focus is primarily on the foundational aspects, or over a two-semester period that allows for the proper amount of time to cover all intended applications as well. It presents a balanced treatment of the topics involved, and contains a

large number of exercises (upwards of two hundred, more than half of which are accompanied by solutions), which have been carefully chosen to amplify the effect, and substantiate the power and scope, of the theory of distributions. Graduate students, professional mathematicians, and scientifically trained people with a wide spectrum of mathematical interests will find this book to be a useful resource and complete self-study guide. Throughout, a special effort has been made to develop the theory of distributions not as an abstract edifice but rather give the reader a chance to see the rationale behind various seemingly technical definitions, as well as the opportunity to apply the newly developed tools (in the natural build-up of the theory) to concrete problems in partial differential equations and harmonic analysis, at the earliest opportunity. The main additions to the current, second edition, pertain to fundamental solutions (through the inclusion of the Helmholtz operator, the perturbed Dirac operator, and their iterations) and the theory of Sobolev spaces (built systematically from the ground up, exploiting natural connections with the Fourier Analysis developed earlier in the monograph). .
