

1. Record Nr.	UNINA9910304133403321
Titolo	Epistemological Dimensions of Evolutionary Psychology // edited by Thiemo Breyer
Pubbl/distr/stampa	New York, NY : , : Springer New York : , : Imprint : Springer, , 2015
ISBN	1-4939-1387-5
Edizione	[1st ed. 2015.]
Descrizione fisica	1 online resource (248 p.)
Disciplina	150 153 155.7 501
Soggetti	Cognitive psychology Philosophy and science Psychobiology Cognitive Psychology Philosophy of Science Biological Psychology
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references at the end of each chapters and index.
Nota di contenuto	Philosophy and Evolution -- The Broad Foundations of Adaptationist-Computational Evolutionary Psychology -- Towards a Cognitive Philosophy of Science -- The 'Meme' Meme Revisited -- Evolutionary Psychology, Altruism, and Kin Selection -- Like Me: A Homophily-Based Account of Human Culture -- Evolutionary Media Psychology and its Epistemological Foundation -- Preparedness to Learn about the World: Evidence from Infant Research -- Depression as an Adaptation: The Infection-Defense Hypothesis and Cytokine Mechanisms -- When Misrepresentation Is Successful -- Human Sacrifice and the Evolution of Thinking -- A Critical Assessment of Christoph Türcke's Philosophy of Dreams.
Sommario/riassunto	As psychology and philosophy arose as answers to the eternal question of how the mind works, evolutionary psychology has gained ground over recent years as a link between cognitive-behavioral and natural-

science theories of the mind. This provocative field has also gathered a wide range of criticisms, from attributing too much autonomy to the brain to basing itself on faulty assumptions about our prehistoric past. *Epistemological Dimensions of Evolutionary Psychology* reframes its discipline for the contemporary era, correcting common misconceptions and mediating between different schools of thought. By focusing on the nature and limits of knowledge and reasoning—the essence of epistemology—contributors offer fresh insights at the intersection of human cognitive abilities as adaptations and our self-perception of knowledge, including evolutionary perspectives on altruism, depression, or the phasing out of human sacrifice. This diversity strengthens and vindicates the field, as evinced by thought-provoking dispatches such as: Toward a cognitive philosophy of science. Evolutionary media psychology and its epistemological foundation. The “meme” meme revisited. Depression as an adaptation. Like me: a homophily-based account of human culture. Preparedness to learn about the world: evidence from infant research. An engaging and often controversial testament to the combined power of evolution and logic, *Epistemological Dimensions of Evolutionary Psychology* will intrigue philosophers as well as psychologists in a variety of subdisciplines.
