Autore	Swingle Paul G
Titolo	Adding Neurotherapy to Your Practice : Clinician's Guide to the ClinicalQ, Neurofeedback, and Braindriving / / by Paul G. Swingle
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer, , 2015
ISBN	3-319-15527-X
Edizione	[1st ed. 2015.]
Descrizione fisica	1 online resource (197 p.)
Disciplina	150 610 616.89
Soggetti	Health psychology Primary care (Medicine) Complementary medicine Health Psychology Primary Care Medicine Complementary & Alternative Medicine
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Overview -- Introduction -- The ClinicalQ -- Treat the Condition not the Label -- Neurofeedback -- Potentiating Neurotherapy -- Braindriving -- Peripheral Biofeedback.
Sommario/riassunto	This clinical manual argues for using neurotherapy to enhance mental health and medical practice across settings and specialties. The text takes readers through the tools and methods of neurotherapy: the ClinicalQ for intake assessment, a stimulated EEG modality called braindriving, and neurofeedback protocols to retrain brain function. Case studies demonstrate neurotherapy as an efficient component in treating brain-related and mind/body conditions and symptoms, from ADHD, sleep disturbances, and depression to fibromyalgia and seizures. Its methods allow clinicians to find deviations in brain function that fall through the diagnostic cracks and choose therapeutic interventions best suited to clients based on reliable data. Included in the coverage: Treating the condition instead of the diagnosis. Case

examples illustrating how to conduct the ClinicalQ, interpret results, and convey them to clients. Sample protocols of braindriving and neurofeedback. Using therapeutic harmonics to advance neurotherapy. Age-appropriate neurotherapy for children and seniors. Brainwave diagrams, data tables, client forms, and other helpful tools and visuals. Adding Neurotherapy to Your Practice will interest psychologists, physicians, psychiatrists, chiropractors, and social workers. This stimulating presentation emphasizes the individuality of every client, and the abundant healing capacity of the brain. .
